

news from no where, class conflict, workers take cover from the lethal shrapnel, from the implosions of the domestic industrial capitalist imperialist state, as the domestic counter value insurrection by individuals & small groups of individuals * continues, as sector by sector falls to the revolutionary action forces, with close quarters hit & run actions, by individuals dedicate to advance the class struggle, in solidarity with radical workers struggles in Spain, Greece, & Bangladesh, all of these struggles share a insurrectionary character, as the only way to advance workers rights, my individual / personal role in all of this, is that of a original supporter of & advocate for revolutionary action forces, & this letter can serve as a revolutionary action force communique, in this class struggle, where every strategem of class war must be employed, with a anti Fascism, anti militarism

economic action focus, this or no other political appeal will ever lead to a arab spring type revolution, which is what is needed to advance the cause of social justice, the only thing that can lead to a arab spring type revolution, is propaganda of the deed, & in this i'm advising extreme caution, & extreme care, in that in this i'm not looking to regress any individual, any group, any social justice struggle, any social justice cause, nor any social justice movement, i'm putting forth a social justice struggle / cause / movement / revolution, that does not leave behind one single person that wants to go forward with it, nor excludes one single person who wants to be involved with it, i'm not saying i have all the answers for humanity, i'm saying i look for all the answers for humanity, my role in all of this is as a martyr advocate for social justice revolution, i'm putting forth a dedicate

an online presence of
propaganda of the deed, that is
link to & sympathetic of this
my prison industrial complex
abolitionist blog, in prisoner zine
style, with a focus on social
justice revolution, which is
individual & or group social
justice struggles / causes, & or
social justice movements ground
swells,
