

# The Teachings of the New Nation

We are the Master of our actions, the world has always been full of men with unrighteous passions, therefore it is a bad idea to follow the example of those who are not of the righteous path, the path of enlightenment; Even great men at times have been misled by those that they love, so it is the duty of the prophet Román and his bloodline to guide you and the true followers to the true way!

The prophet says "Knowledge is not realized when we listen but do not heed, when the truth is spoken but not remembered or heeded it leads to distortions of the truth and debates amongst believers and unbelievers, and that in turn leads to people becoming part of those that are lost."

In 1525 the prophet went to Rome to present the Teachings to the pope, but the pope did not read them until 1532. When the pope realized that the books had predicted events of the history of Peru, and Italy from the fall of the western empire to how the 15<sup>th</sup> century would begin; He sent for the prophet. When the prophet arrived he said "O, pontiff, if only you had heeded these teachings when the Divine sent me to you, then would these things have been prevented, but now I bring word that because of your wrongs you have brought death to Lorenzo the Magnificent and a change to the path of Italy's future."

2

The pontiff replied, "what you speak is not of truth for Lorenzo the Magnificent still lives." As the pontiff spoke a Cardinal entered with tears of sadness and fell to his knees and said "O, pontiff I bring you news of bad tidings," the pontiff asked "what is this news?" and the cardinal replied "on this day is Lorenzo the Magnificent dead." The prophet then said "pontiff, the Divine is the true GOD of all and works only in truth, and I am His vessel, so I only speak truth." After that the prophet headed back to where he had come from.
