

ECUMENIT'S PATH TO ISLAM

MIKA`EL ABDUL AN NUR

"The point of origin of Allah and the Universe originated in ourselves as the source of all divine light. It is at this central focal point, or arc, in the heavens that unites us to the center of our universe and the origin of Allah himself. He revolved in the darkness of space until he became light of himself and cause all life to revolve and evolve around his own self-creation."

"To understand the science of creation and the universal order of things. One must apply the knowledge of mathematics. The language of mathematics reveals the true nature of our (spiritual believers) religion which is ISLAM. Allahs true religion is derived from the nature of his own self-creation which leads to the nature in which we are all created."

2 quotes from a speach I read long ago. I had a sanity saving epiphany. If you are like me. You would like for everyone to know, see and under-stand Allah/God as clearly and easily as you do. If you are like me, you at times, forget that not everyone will accept the truth as you see it. Knowing this, I could not help but wonder why it is so difficult for so many people to gain the wisdom as I have? There are a few essential elliments necessary for ome to know Allah/God rather than just belive in Allah/God.

The above quotes speak of not only God's self-creation, also how the very preocess of this self-creation is the NATURE of ISLAM, and this process is MATHEMATICS. I am able to understand these quotes without much trouble because the foundation of my Islam comes from The Master Teacher. However, in my daily life of sharing and teaching to others the essnce of Allah/God in all things; many people find it hard to believe that Allah/God really exist (Existence being real on all 3 planes: Spiritual, Mental, Physical). Because of this lack of understanding or L.O.G.I.C. (Level O f God I C) there can't be unity in all the people who believe in the existence of Allah/God. Only proof can show the disparities in religious idiologies, only math can prove the proof. If you don't know the language of mathematics, you can't see the face of Allah/God.

Many people have called me crazy, nuts, and insane to say the least. These comments come from people who don't know the math. Others say I have good understanding, am right & exact, am wise and intelligent. These come from those who know their math and/or have a clear understanding of Allah/God. No matter what side you take the Truth remains, not with me, with Allah/God.

Knowlegde this: There's a reason that Allah/God created all things in 7 days (instead of 1, 9, 100, or 1 million days). There's a reason God created only man and then made woman for his company to make 2 people. There's a reason Allah/God made it rain 40 days and 40 nights, the same reason Prophet Isa` fasted for 40 days and the same reason Allah /God choose Prophet Muhammad at the age of 40. There's a reason Jonah spent 3 days in the belly of the big fish, same reason Prophet Isa` was raised on the 3rd day. To know these reasons you must know your math. Not Arithmetic..Mathimatics. Or be blessed by Allah/God with discernment.

I learned a valuable lesson in my journey to Islam. No one can solve a problem without first having a formula to use, and then being able to identify the clues. Once you have these. You can clearly see how Prophet Isa`, Buddha, Musa, Abraham, Prophet Muhammad, Martin Luther King Jr., Ghandi, Malcolm X, Clearance 13 X, and the Honorable Elijah Muhammad all practiced ISLAM. You will also be able to see the meanings in Allah's/God's signs. A Talking Bush? Speaking Ants and Asses? Walking on water? Giving sight to the blind? Raising the Dead? Know the math, see Allah/God and understand the signs. This will unite God loving people all over the world. Increase your L.O.G.I.C. and become a greater being.

I do not profess to know everything. I do not have all the answers. I just know that, We the people are the reason that we cannot unite in the name of Allah/God. It is the fault of the people, not Allah/God. The blue print is given to us. Yet, we see only what we want to see and disregard the vission of others. This is why I consider my spiritual/religious path to islam a blessing.

I was raised first as a Catholic. Until I seen the movie The Exorcist. I refused to go back to church because I was convinced that the devil and the catholic church were working together. In order to get me to go back to church. My family became Baptist. (Oh! How much fun that was). We may have celebrated God only on Sunday's, But boy on Sundays we went BIG! As I grew in my spiritual hunger for truth, clarity and mo~~s~~ knowledge, my journey began. I had a question that the baptist church could not answer for me. It was answered in my ⁿintroduction to Buddhism. Another question arised that was only answered in my introduction to Wicca. Another question arised that was answered in my intriduction to Islam. When asked why I stopped changing religions? I express, Islam has a formula and a method to finding out the answers. Islam is Mathematics and Mathematics is Islam and can be proven in no manner of time.

It is because of my journey that I am able to see Islam/Mathematics in all my past studies of Chritianity, Buddhism, Wiccan, and other religions I study. I also see where the seperation in them comes into play. Because I have this clarity. I try to share it so we can all become ONE unified family. Because if my math serves me correct. Islamic cycle is ending and all things will become new. None of the old will remain. Only the principles of islam will remain. That's a whole other story.

My journey may have been pre ordained. It may have been destined. Nevertheless, it has me here today with all of you...celebrating Islam embracing our brotherhood, and planning to make the world better. All praise are due to Allah/God.

PEACE.
