

## SETTLE down

It's time to put the guns down, down, down and down. we suppose to be adults. whatever happen to communication. Communication is very important. If you don't have communication. It's like your life line has been destroyed.

All these killings that are done by police and citizens in our society needs to stop. A lot of police officer are too cocky and prideful feel as though they are police; nobody will hold them accountable for their action.

The law of the land (polices) some of them gets a thrill off of locking so many citizens up per day. Even if they have to create a situation. So a lot of this hostility is coming up against polices' because the citizens knows they are abusing their authority and not following the laws of the land themselves.

Many citizens feels like hey why should I follow the law of the land when I just sold the drugs to ~~them~~ them etc. No that is no excuse to break the law. But these days you have many law enforcement breaking the law than abiding by them. But they suspect the citizen to be perfect. If the law enforcement is not leading by example. How can you suspect the citizens' to abide by every law.

When the law enforcement integrity and morals are corrupt. Just like the places of business and Department of Correction is audit so many times a year to make sure they are doing what they suppose. There should be some type of investigation with our Justice Department. The investigators' needs to go through every area of that department very carefully. Because there is too much corruption going on.

When they go into to investigate. They need to take on the mindset that some of the law enforcement is very clever. These individuals been covering up for each other for years or decades. That this has drastically taken our Justice Department in a wrong direction from which the foundation has been layed out.

Nobody has paid it any attention. But all of certain something has happened such as many unarmed citizen being killed. Things has become more knowledgeable, that their is a problem within our Justice Department.

As citizen's we have to become more of people knowing how to deal with each situation in adult mannerism. Each person has a supervisor. But if the supervisor is dishonest themselves, what can you do, who can you talk to and where can you go for help?

Currently I am doing a leadership group. We are doing our study from the book titled "The 21 Irrefutable Laws of Leadership" by John C. Maxwell. I am in chapter 4 The law of solid ground. This law is talking about Trust is the law of solid ground. In our government trust has went out the window.

Instead of the government making things better in our communities and within our government. The leaders are making things worst by the lack of their integrity. What trips me out, most of our problems are within the United States and local government. The leaders' see what they are doing not working. Why not change course in a different direction.

Why can't we knock each other up in our government by setting down with other successful leaders who has overcame the same area or barrier you are having problems with. By asking them, "What course did you take to correct these problems. Instead Government leaders are busy bickering, tearing each other down and betraying trust with each other. This has to stop. ~~The~~ the Government needs to focus on the needs of the people who vote for them to be in that office in the first place.

Government leaders needs to ask themselves "are we being passive when it comes to important issue such as unemployment, hungry Americans, homeless, police shooting unarmed victims, and receive no time in jail or prison." But a citizen can shoot a cop or cops they get the death penalty. That leads me to a question what is the difference between a cop shooting unarmed citizen and the citizen who killed the cop or cops. Both of them is wrong. what makes the cop more valuable than a citizen. Both of them are human being that does not deserve to have their life taken away. I had to throw this in here because the laws in the United States don't make any sense half of the time.

But I realize that sometimes stereotype is the basis for the outcome of each situation in America. ~~Us~~ Us in America wants Unity and Equal Justice in our Society. But we have to realize something. There is no Unity and Equal Justice in our United STATES and local/state government. This is a true statement from the Bible. If a house be divided against itself that house cannot stand.

We got to get Unity and Integrity in our government so when things do happen in our communities that is unlawful. We will have a government that will make the right decision in our favor. Right now our juries system is so broken it don't make any sense. People who does jury duty needs to be mindful that people may not hold them responsible for their decision because they don't know all the under handed things go on with their duties. But one day they will have to give account for their decision; when judgement day come with God.

There is a lot of under handed things that goes on in the dark with ~~juries~~ jurors, DA and judges. That is why the correct decision is not coming down to indict those cops for ~~the~~ the unarmed victim's death. We got to realize some of these people has been doing dirt for years or decades and getting away with it.

A lot of these people has been fooling their bosses, colleagues or subordinates many of years or decades. The people around thinks they don't do no wrong. So when they do something horrific etc. They going to back them because these people are nice and do a lot of kind deeds in the community. Not knowing these people have a different side to them around the people just like them or in secret. We need to be careful who we ~~vote~~ into office because people will tell you all kinds of promises.

But when they get in the office. All you see is destruction. My personal opinion of our United States government is that everyone that is a government official should be investigated at some point to make sure they are doing what they suppose to. Those who has had numerous of complaints need to be fired or force to resign before they bring destruction to that hold department.

We need our government to be in unity and have people in our government that has integrity. Because so many people trust has been violated with police and other government officials. ~~This~~ Here is where we are with the United States Government and Local/state government.

The government needs to realize; People will tolerate honest a mistake, but if you violate their trust, you will find it very difficult to ever regain their confidence.

The governments needs to learn how to treat trust as ~~their~~<sup>their</sup> most precious asset. That is why we ~~had~~ have protesting going on after these unarmed deaths with the police. Let's bring the Unity and integrity back into our government. By getting those people out of the office that does not have the people best interest at hand. ~~the~~ Majority of the government leaders, all they concerned about is power, prestige and what they want.
