

SHIRLEYWORLD UPDATES
"Let The Bullets Fly!"
Chapter XXXII

by Timothy J. Muise

* * * * *

- MCI SHIRLEYWORLD EXCEEDS INFAMOUS ALCATRAZ IN SECURITY (LAUGHTER ROARS)

I don't think you would find too many folks in this fine country who have not heard of the infamous federal prison Alcatraz which was located on Alcatraz Island in San Francisco Bay. This "Super Max" Prison was opened to attempt to thwart organized crime efforts and eliminate escapes which had been fairly common. What folks may not know is what the "Super Max" staffing ratio of Alcatraz was: it was 3 convicts for every 1 staff member. Now please remember that "The Rock", as Alcatraz was known, held the most ingenious and hardened criminals the federal system housed, and the all-knowing feds, with unlimited monetary resources, felt the 3 to 1 ratio was more than adequate to run a "Super Max" prison. So now, with all this said, the citizens of Massachusetts can rest safe in their beds knowing that ShirleyWorld, in the infamous bastion of correctional foolishness is now even more secure than "The Rock". You see the infinite wisdom of DOC High Priestess Carol Wiggins-O'Cryin has allowed the staffing ratio in this fine state to rise to 2.2 convicts for every 1 staff member. Congratulations Ms. Wiggins-O'Cryin you have surpassed The Rock! The big difference is that Alcatraz actually held crooks, like Al Capone, Jimmy Bulger, Nicky Montos etc., and your system is staffed by crooks! You should be collecting your paycheck with a ski mask on as you are truly robbing the taxpayers. Here at ShirleyWorld you employ repeat drunk drivers, wife/girlfriend beaters, bear killers and firearms violators, rehab repeat offenders and suboxone smugglers. As your staff shout "We walk the toughest beat in the state!" many of them are showing boobs to prisoners, doing the horizontal mambo down in the gym office, stealing everything that is not tied down, smuggling in suboxone and K2, and generally making a daily mockery of the system you have robbed for the past 30 years. The laughter roars as "suits" speak of "security" and deputies instruct in "reentry" programs. Men housed at ShirleyWorld wander the camp as high as Bob Marley on his birthday and as drugged out as Keith Richards at the Rock & Roll Hall of Fame party. With this highest staffing ratio in the nation you still get away with the great overt confidence game that is "reentry programming" as each and every day here at ShirleyWorld they close buildings and shut down programs all under the premise of "understaffing", what an f-ing joke! There are more cops here than at a free doughnut giveaway. This DOC den of thieves and con men must be dismantled like probation, hopefully with some "chiefs" heading off to prison themselves. ShirleyWorld is the new "Rock", that's for sure, but it is the rock of lies, deceit, theft, and public safety debauches. Pull on your ski mask Ms. Wiggins-O'Cryin and pick up your wheelbarrel of blood money!

- "LOVE IGLOO" OR "CHEESECAKE REFRIGERATOR"? / YOU BE THE JUDGE

Our fearless King of Walks and Grounds, CO Scumlafia, made a very startling discovery this past week which resulted in the prison being locked down and the state police being called (you can't make this shit up!). His Royal Snow Shoveling Commander found what he could only characterize as an "Escape Bunker" made into one of the snow banks here. You see someone had dug a small snow cave and were storing cheesecakes

and bottles of soda in it. They had covered it with a white sheet and this obscured the cave's opening. Our Genius of Snow Removal called in all forces in the greater Shirley region to come and "investigate" this undoubted "escape cave". You had IPS Commander "Awe" who was most certainly in Awe of this unique escape tactic: let's hide out in an igloo??? You also had Deputy McCan't who McCan't believe that such an opportune moment arose in which he could assert his "security" prowess: "Let's call in the state police?", McCan't roared. Lt. Awe nodded in agreement and a call was made to the Violent Fugative Task Force to report that a "Man Cave", "Love Igloo", "Cheesecake Factory", "Nanook Refrigerator", "Eskimo Encampment", "Tundra Townehouse", or any of the many possibilities was found on the grounds of ShirleyWorld. Now the prison gristmill immediately began grinding and I can only imagine how zealously highly trained CPO's reported that this Igloo may have been used for a Love Shack, little cold for that but I guess anything is possible. Can you imagine the looks on the face of the State Police when they questioned our Snow Removal King about his "find"? They must have been dying to scream, "ARE YOU SHITTING ME???" Men are pointing .44 magnums at us in Boston and you guys got us here looking into a cheesecake refrigerator!!! All part of walking the toughest beat in the state I guess. Now the sad part is that you can't call back a bullet or unring a bell. These friggin fools here made such a big deal about a cheesecake refrigerator that they can never admit their overreaction. They will screw the two mentally challenged convicts they lugged over the incident. As usual the two men they locked up over this should never have been at ShirleyWorld to begin with as they both have documented mental health histories. One of the men was deaf so i guess they will have to "sign" his "Attempting to escape" charges to him and I hope he "signs" back with a rigid middle finger. For me it turned out to be a nice night. The fools had to "deliver" my food to my humble cell (I gave them a tip = Avoid Snow Igloos) and I got to write an article about correctional wastefulness and the continual diminishing of public safety. Some poor convict, with no family left in his life, does his best to get by through making and selling cheesecakes to convicts. He makes a refrigerator to store them in and then, all of a sudden, he is in the hole for attempting to escape? Only at ShirleyWorld. I think Deputy McCan't should force The King of Walks and Grounds to make small snowmen between each block, put a DOC hat on them, and have them watch for any other possible Igloo construction; they would do as much work as any other guard here.

- DEPUTY DENIED-OH TO RELIGIOUS VOLUNTEERS: "GO TO HELL!" (I'll meet you there)

Deputy Denied-Oh, the consummate correctional professional (I just threw up in my mouth a little again) issued a resounding decree concerning the many religious volunteers who come into ShirleyWorld: "GO TO HELL!" Now some decrees are verbal and some are issued through "actions". This latest decree, direct from Hades, was one of those "action" issued orders. These dedicate and caring folk drive out to the prison only to be told: "The

Chapel is closed." These programs the volunteers run require access to the Chapel, the Deputy knows this better than anyone, but she signs on to this major "understaffing" con game and allows buildings to be closed, allows the Chapel to be closed. While fools like Lt. Peckerwood are hiding in some dark office performing their sword swallowing act these good folk are tortured by entrance trap guards. Lt. McHardly drools on himself in the School office, Rip Vanwinklin' his paychecks in, and Prorgam Facilitators are told they cannot access their classrooms or materials. CO Dunn=derhead pulls up a sick cons case on the computer screen in the HSU and has all Deputy Denied-Oh's "companions" read it in hopes that they will assist him in abusing this dying con. This is Deputy Denied-Oh's world and she struts around lauging and joiking while the volunteers get the mesage loud and clear: GO TO HELL! I guess Deputy Denied-Oh is lonely down there and wants company. I'm just so glad that many men are not Stockholmed by her hollow promises and crumbs she offers from her correctional table. In my fishing days of old the y refered to people like her as "one way" deckhands. You see some folks made it out to the fishing grounds but did not make it back. You told the captain, "I don't know what happened? One minute he/she was standing there, the next he/she was gone??? Must have fallen overboard. Too bad we are 80 miles from shore." Such a shame they don't have "one way" trips here on the SS ShirleyWorld as it would be a good way to get rid of a problem.

- LT. SHAMELESS PECKERWOOD WINS ANOTHER AWARD / FIRST OF 2015

American Security Solutions (ASS) has named Lt. Shameless Peckerwood as their "Sheman Of The Year" for 2015. In the official notice they praise Lt. Peckerwood for "holding the highest standards of diversity through his efforts to bring 'bi-curiousness' into the mainstream." This prestigious award touts Lt. Peckerwoods "feminine qualities" and "moody and emotional sheman traits" while going on to recognize the difficulties of being trapped in a "bitch's" body while doing your best to pretend to be a man. Rumor has it that the Federation Of Organized Lightloafers" (FOOL) is also considering Shameless for its "It certainly does count in prison" award. We will keep you posted! Congratulations Shameless.

More To Come...
