My trips to RMC (Reception medical center) at Lake Butler the past 6 weeks has brought further staff abuse to my attention. Most of which I learned from sitting and listening to officers talk. This week I learned that an inmate at Suwannee Correctional Institution kicked an officer. Well the inmate wasn't restrained, he was beat almost to death. If the officers conversations are correct the inmate is in the hospital intensive care unit (ICU) on life support. I haven't heard anything about this on the news.

Last week I believe on March 3, Tuesday an inmate was being transferred from Century Correctional Institution when he arrived at RMC he was dead. The transport officers said the inmate was banging his head on the van. But like the officers who were talking said, why wouldn't they call that in and stop at the nearest prison or jail? so there's something wrong with their story.

On Thursday February 19, 2015 inmate D. Gonzales number E07143 was jumped on and assaulted in B-Dorm at RMC. the GED teacher witnessed the assault. No Inspector from the IGI's office has even investigated.

the issue. The Inspector General's Office is really good at turning a blind eye and a deaf ear to inmate abuse.

on Wednesday February 25, 2015 on K-wing at RMC Officers were turning the lights OFF so the cameras couldn't see, they were going into the inmates cells and beating on the inmates. Also they were denying the inmates soap, toilet paper tooth paste and tooth brushes. The black inmate I talked to had nothing for 5-days, so what you say, well that inmate your treating like an animal will be released back into your society on March 19, There's the problem. And that inmates missing half of his ear, because staff was allowing the inmates to fight in the cells and not stopping it. I don't remember this inmates name, but he can be traced easily, on Thursday Feb 26, he was in a holden cage next to me, so he can be identified through his DC6-229 Chart. And he was housed on K-wing the 2nd Floor. The white inmate Boname was on K-wing 2nd Floor for 3 days no toilet paper soap or tooth brush and paste. And the camera will show the officer feeding one day didn't feed him.

I was watching the other day some one in this senate hearing saying "I

don't believe that's the IG's job to be
policing the FDOC. The dummy didn't
read 944.31 Florida statute. The IG's office
is set up to be a watch dog, to see that
the prisons are operated in a Constitutional
manner. But the records show that the
office isn't doing their job.

The abuse and deaths and beatings that I've
just told you about here, I hope you will
report to Mary Ellen Klas of the Miami
Herald and allow her to investigate this and
report on it. Please download a copy of
this and send it to her. Thank you for
your time and help. God bless you.

In Peace + Love

Jannie
