**- RUBBER STAMP WRY-ON BOOKS ROCK BAND "STEAM" TO PERFORM ATOP TOWER**

Our Featherless Leader (just like the new perching owls) has secured the next act for her Ivory Tower Concert Series here at ShirleyWorld. Ms. Wry-On has booked the 70's rock band "Steam" to perform their chart-topping hit "Nah, nah, nah, hey, hey, hey, Goodbye!" from the soundstage atop the Ivory Tower from whence she rules. Steam will perform this number in honor of the dismissal of disciplinary report No. 330309 which assistant warden Denied-Oh issued the Free Speech Warrior. Steam will turn up the volume to "11" as will the Warrior in his "invitations" to government officials to come here to ShirleyWorld to see/hear first hand the dereliction of duty committed daily by Warden Rubber Stamp and Assistant Warden Denied-Oh. Steam has promised to make stage announcements similar to the Woodstock "Don't eat the brown acid." declaration made so famous. One planned announcement is, "Don't drink Warden Denied-Oh's kool aid.", and another "Don't eat her humble pie." As our femme fatale wipes her lady cushion with the parchment of the United States Constitution fans in the crowd will "mosh" to this widely popular sports anthem. You will have men with canes, Canadian crutches, wheelchairs and walkers, doing the mashed potato celebrating their designation by Warden denied-Oh as being "threats to public safety." The well paid "companions" in the gulag sanitation program up in the HSU (willing to kill for \$21.50 a week) will each receive an extra dollar a week to wheel sick and dying octogenarians out to the concert in the rolling death beds. Dementia patients may think they are seeing the Who or Led Zeppelin but as Warden Denied-Oh says, "parts is parts!" It has also been reported that Warden Denied-Oh, Director of Mistreatment Lurking (the "good cop" to Denied-Oh's "bad cop"), and Director of OverClassification Parishilton, will be dancing LSD infused Grateful Dead/Deadhead "whirling durbishes" in the staging area in back of the 113 Shack. Many look forward to seeing Director Lurking in her tie-dye leotard, especially Captain Shebert (his new address is "Stalk"ton, California). We are so fortunate to have such artsy and liberal rulers here at the gulag. Rather than getting a blindfold and cigarette before you face the "firing squad", here at ShirleyWorld you get a tune and "I trust this addresses your concerns.", before you die your civil death. Rock On Warden Denied-Oh! (You already display the "devil horns").

**- DEPUTY/WARDEN McCAN'T REQUESTS EXHUMATION OF "BUGSY" SEIGAL'S BODY**

In a very bold correctional advancement move our own Warden G. McCan't (he "McCan't" find enough places to hide out here in the woods) has filed a petition in the United States District Court to "exhume" the body of reputed gangster Benny "Bugsy" Seigal in order to secure some DNA for genetic cloning. You see Warden McCan't runs the biggest casino north of Atlantic City right here at ShirleyWorld and he feels that if he could "clone" his replacement using the DNA of Bugsy than future generations of convicts and the disabled could have better gambling opportunities here at ShirleyWorld. Warden McCan't wants expand upon the two (2) sheet covered poker tables that he sanctions in each housing unit but really is limited in his resources. These tables, taking in thousands of stamps per week, are like the "opium of the people" making men forget about education and programming while reducing the "work load" Warden McCan't

is subjected to through his numerous "meetings in Culinary Arts" where he pays a "deuce" for a three course meal; all on the taxpayers dime. If Warden McCan't can design his own Frankenstein Monster he could engineer him to expand to roulette and craps. Possibly he could convince Keefe Corp. to turn the Canteen kiosks into slot machines with men buying "casino cards" similar to the \$5.55 "Media Cards" they now purchase for overpriced music. The plan also includes a proposal for GID men with boobies to serve drinks (homebrew spritzer, red eye on the rocks, and other cell distilled libations). These GID patients could wear nice cocktail dresses and carry the old dirty chowhall trays as part of the recycling program here. It is a comprehensive plan and Warden McCan't has secured the finest legal minds at DOC Legal, Nancy Ankles-Tight and Steve Ass-He, to argue his request before the Federal Court. I am certain that he will make the next issue of "Around The Block" for such stellar efforts toward progressive corrections. As the crips, bloods, netas, latin kings, vice lords, and boyohs all make further criminal plans here at McCan'ts operational failure, you can rest uneasy in your suburban bed knowing that these gang-bangers are headed your way all "gassed up" by the very real failures of Wardens and Assistant Wardens like Deputy McCan't. Want to "bet" that his poker face reveals a sly smile when he retires and a new Frankenstein takes over? Two books on "yes".

**- SHIRLEYWORLD OWL TESTS POSITIVE FOR HIV & HEP C / GIVEN K.O.P. MEDS**

One of the rare Decoy Owls (decoyous owlonous assininus) has tested postive for both HIV and Hep C. In a rare breach of medical confidentiality Deputy Denied-Oh has released a statement that her crack HSU staff will supply the owl with "Keep On Person" (KOP) medications as long as the owl can afford to purchase a combination lock for \$8.00 through the prisoner commissary. The owl, looking peeked and drawn, rolled his yellow eyes and "mumbled", "they only pay me \$1.00 per day to stand guard over the pigeons and I am indigent, as well as indignant. How can I afford a lock?" IPS Investigator Wiggles Push-Hard is trying to determin just how this owl may have become infected. Eyewitnesses saw one of the many ShirleyWorld pigeons humping this particular owl and many have questioned whether the interlude was consentual or not. CO Wiggles Push-Hard stated, "If this pigeon took advantage of this poor owl there will be consequences. I know you may not think we give a "hoot" about this type of assault, but you would be wrong in that thought process." Now I tend to believe CO Push-Hard as she is certainly an expert on both pigeons (stool pigeons) and Hooters as she sports a very healthy pair (of eyeballs of course). The MSPCA is outraged that even the avian inhabitants of ShirleyWorld are subjected to inadequate and negligent medical care. When asked for the prison's plan to treat these sick owls Deputy Denied-Oh stated that they would receive the same level of care as the dementia patients up in the HSU; that being having CO Hands-Of-Sin snap a medication cup in their ear while all the nurses laugh at the "joke". It is also reported that Warden Rubber Stamp may allow the owl to obtain a coveted red sticker but we heard that the owl declined this benefit as it did not want to be questioned by Lt. Shameless Peckerwood each night on his way to chow

as Shameless has been named the new Commander of the Red Sticker Task Force. Lt. Peckerwood feels he may be able to "secure his first win" if he gets into a fight with someone in a wheelchair and using a walker. "Hey, a 'W' is a 'W'." Peckerwood was heard gurgling, white residue in the corners of his mouth (Hey, maybe he infected the pigeon?). The owl's family has purchased a plot in Potter Field, through Keefe Commissary, as they are very familiar with the abusers who work in the HSU here at ShirleyWorld; birds of a feather flock together for abuse.

#### - FOX INVESTIGATES KILLING IN SHIRLEYWORLD CHICKEN COOP / ABUSE THRIVES

This past week the Warden's Investigator, Lt. Canvas Back No-Mas, acted as "fox" investigating The Warriors reports of misconduct which were made to the new Secretary of Public Safety. Many of the "stars" of this blog (Lt. Peckerwood, Lt. McHardly, Lt. No-Honor) were all in the formal complaint to the secretary. We all know, all of us prisoners who have been around a while, that the so called investigator ain't gonna do shit, he will high 5 with Peckerwood and back-slap with Mc Hardly, but when we have our own "Joshua Messier" situation here at ShirleyWorld these bastards won't be able to say they did not know. Good ole Luis "Fear Factor" Spend-Her was sent packing after the "Messier" incident, and when this daily abuse by Peckerwood and crew sparks another incident, as it undoubtedly will, we hope to send a few of these oxygen wasters here packing as well. Rubber Stamp Wry-On plans her vacation and stocks up on sun tan lotion while Peckerwood and his ilk create climate issues on every 3-11 shift. She ignores these fools and I take that as a sign of unity with them; she is as guilty as they are. The other night one of Shameless's "rookies" (being trained by the biggest coward and pussy in the department) got right in the face of a prison volunteer. The coward, trained by a coward, had to come back later on and apologize to that volunteer, who vowed to take the abuse to legislators. Of course no official "reports" were written, but you can trust that The Warrior is going to let people know. More Press Releases are at the outside printer as I write. In the very near future I hope there is a real "Fox Hunt" here!

More To Come...
