APRIL 2015

WISCONSIN: Lori A. Larue, a former employee of food service contractors at the Dodge County Jail, pleaded guilty on June 9, 2014 to one count of second degree sexual assault, a second felony count was dismissed. An investigation determined that Larue, 46, had been carrying on sexual relationships with two prisoners in the jail's kitchen. She initially claimed she had been assaulted by the prisoners but was too afraid to report the incident, however evidence of the inappropriate relationships came from the jail phone transcripts which indicated Larue had made at least 150 sexually explicit calls to the prisoners. She was sentenced in November 2014 to seven months in jail and five years on probation, and will have to register as a sex offender." PLN 2015 APRIL, p. 68

# WHAT THE H\_...!!!

"OREGON PRISON GUARD UNION  
SUES MENTALLY ZLL PRISONERS."

Oregon officials claim 16 Percent of its state  
Prisoners are "mentally ill" ... of the 14,500  
16 Percent are "Severely Mentally ill".

Commencing in 2013 the Prison Guard's  
UNION began suing these Prisoners for Money  
Damages who allegedly assault's Prison staff.

According to "Mike Van Patten, an Oregon  
State Penitentiary (OSP) sergeant and President  
of the Association of Oregon Correctional employ-  
ees (AOCE)" in part to "hold them accountable!"

Naturally, Poor Prisoners cannot afford to hire  
Attorneys, Severely "mentally ill" Prisoners cannot  
competently represent themselves in court !!

Thus, the current count is "10 to 15 have  
resulted in default judgments" - failure to file  
an answer and defense to the CIVIL COMPLAINTS;

Others are yet Pending. Thus far the guards have collected NO money.

But the Oregon State Legislature is currently working on a BILL to allow prisoners' institutional accounts TO BE GARNISHED.

✓ It's on your brain,  
Scientists know that touching (or even thinking about) any body parts lights up a corresponding area of the brain. But it wasn't until recently that researchers at Rutgers University in New Jersey found that significant real estate is dedicated to the clitoris and just thinking about clitoris stimulation activates the same area in the brain as physical stimulation does, which may explain why some women can think their way to orgasms."
