Reply Id: ~~████████~~ iigh

Thank you for trying to help us. God knows Pulaski State Prison needs a lot of help with a lot of things. Some people go to far with they authority. We know we are in prison. We are here for correction and Rehabilitation. That does not mean treat us inhumane. This week we have receive two E-mail on our JPay account from upper staff. One was I am not going to have inmates cursing staff out. first of all it's not political right to curse no one out. But you have staff members who are Sgt, Lt, and Co's cursing inmates out. Inmates get called b*ts and MF's all the time. You have upper staff calling inmates cock roaches etc. The mental abuse is real at Pulaski State Prison behind the barden's back. Then we receive another E-mail that says we gonna receive disciplinary report. If they see any lines in our uniforms. Here we go again getting threaten over foolishness. The upper staff stated that is what laundry for. The truth of the matter about laundry. They suppose to press our clothes but instead our clothes come back wrinkle. So we take our ~~████~~ Hair flat iron and iron clothes. So we can look decent. Now you do have some people who put double lines in ~~████~~ their clothes. That doesn't have nothing to do with the whole compound of inmate. That is nothing I don't like is when a few individual do some Ruthless act. Everybody suffers, I feel that is not right. I feel they should suffer for they own choices. People like that will always do things to harm others. That is the

same way with Georgia Law. Many innocent parties get caught up. Because somebody who do something wrong. Drag innocent people in it they mess. All I ever heard all my life you chose to be around such and such so/so. But that person might have done what they done in the dark. The other person had the idea. I hate when people make judgements or pass it without knowing someone and all the facts behind the story. That is how our society is. They feel because we supposedly made the choice to come to prison. We deserve to be treated inhuman. You shouldn't come to prison. But it's a difference Correction for the right motive, Rehabilitation for the right motive and giving authority for the right motives. What people fail to realize. Coming to prison in our society is not just for the guilty but also for the innocent. For decade their has been innocent people come to prison. It's just become more obvious these days because people are talking more and new technology DNA is ~~for~~ causing a lot of freedom. I am not guilty. I am telling my story everytime I get a chance. I am part of the the victims of overcriminalization. What the Justice Department, DOC and County Government needs to focus on correcting their mistakes they have created in Georgia. Overly zealous government and the excessive power of the State of Georgia. There are some inmate are guilty. But they are still humans that made the wrong choices. I talk to my peers all the time. The worse things that hurt

inmates being away from their family members. If they don't have no family. The freedom to make choices for them selves. All this not feed us healthy food, treating us inhuman because they made the choice to come to prison. for some people that is true, but they are still humans. The message I am trying to send to our society today. We have to stop being so judgemental and prejudice against inmates. Our society need to realize today could be their day to come to prison. Whether your guilty or not. It doesn't matter what your status quo. The judges, lawyers and DA do not care anymore to do their job according to the law. They let the false witnesses do it for them. They do not care as long as they get a conviction. Especially(Georgia). The reason Georgia is in this bind far as a lot of things Lelyne Gardner who was in office at one time and later committed a crime. Said The inmates was living to good. Took out the good food the inmates was eating, and exercise equipment etc. Also Took out a lot of our education programs. Still to this day especially the women at Pulaski State Prison far as education. Our Education is

vocational

We have Business Technology, Cosmetology, Graphic arts/printing. We use to have culinary arts. But they shut it down recently. Everybody trying to get transferred to Alto State Prison so they can get their Education because it's hard to get into A trade at Pulaski State Prison because of limited ~~and~~ space and because they try to get the ones who have a TPM in first. I of the parole board just suddenly give you a date. You're out of gas because your going out without anything to work with in society and \$35.00 check-in ~~in~~ Georgia Men Prison has more vocational trades in their prison than women. The only reason Alto State Prison which is a women Prison now. The only reason they have many vocational because it was men prison. The women only have two transitional Center. The men have 8 transitional Center compared to women. In Georgia Women do more time than men. Alto Women Prison ~~not~~ believe in getting ~~them~~ their women out back into society. Pulaski State Prison believe in holding their life and long ~~term~~ term sentences into prison. Just recently Alto State Prison had 10 lifers to make parole to Pulaski State Prison zeros. Pulaski State Prison has elderly women who has been denied 6 and 8 times. I everybody is questioning what is being put on their parole summaries when

The parole board sends them. We need the people in society to help us at Pulaski State, Prison. Medical oh my God is awful. We have a State Doctor who has committed malpractice in another state. But Pulaski State is holding onto this Doctor who is not taking care of the inmates like he's suppose. They have been inmates who died under his watch. This man has been all in the news about his malpractice. They have not removed him from Pulaski State Prison. I try not get sick to keep from going to medical. Our dining hall is getting worse. We don't even have enough cups to drink out of. They run out of cups. So ~~few~~ half of the inmate get a drink. The other ones don't get anything to drink, yes we get fruit but the inmates are so hungry. Everybody eat their fruits. People don't make alcohol to quick. But it have been done in the past. That happens like once every three years or more.

Our minds are not like that. We are shock down as we enter out of the dining hall. People look at people who are big. They say their are eating good. Some people are big by hereditary. We need help at Pulaski State Prison.
