

9 DOWN, FLAG DOWN

by Myron E. Edwards, Sr. (6-23-15)

Here we go again, another racist attack where Black-Americans don't defend. Don't defend even our own lives, knowing that we are about to die! Has the message/movement of Martin Luther King, Jr.'s non-violent approach, pacified us so much that we don't even seek to run while watching a fool blast his gun... look what the civil rights area has done!

Now there's 9 down - when they watched the fool reload and blast off more rounds. Do we just wait our turn like a good little nigger, as this fool continues to line us up & pull the trigger? We have been pacified so much that our rational lacks common sense - fight or flight, even an animal would have adopted that defense! Why didn't none of the able body Black males rush this fool, to stop him from killing our sisters, daughters, mothers, grand-mothers, and even aunts too? They may have been shot & killed in the process, but at least they would have died for something, and their body count would have been so much less.

Now there's 9 down - when they watched the fool reload and blast off more rounds. Do we just wait our turn like a good little nigger, as this fool continues to line us up & pull the trigger? We have been pacified so much that our rational lacks common sense - fight or flight, even an animal would have adopted that defense! Why didn't no one seek to run to any of the exits - we just sat & watched... knowing that we are next on some racist fool's hit list.

Yeah, now there's 9 down, but this is the price we pay to have them finally take the confederate flag down... something that the NAACP compromised with them not to do ANYWAY, 15 years ago, check into it, it's true! Our voices are only heard & honored when our blood is shed, must the streets of our communities turn red?! Or maybe we'll continue to march on sore feet, with hoarse voices - we act like fighting back is not one of our choices. Aren't you tired of begging racism to stop being racist - Hell, this doesn't make any sense!

Even with 9 down, the state of Wisconsin's governor is holding true - saying the confederate flag is a state's right issue, not to be confused with a political agenda. Is not a flag the epitome of politics... or maybe this is just an euphemistic way for governor Scott Walker to say, "Niggers, you don't count in this day." Oh yeah, has anybody heard from Kanye?!
