

SHIRLEYWORLD UPDATES
"Let The Bullets Fly!"
Chapter XXXVII

by Timothy J. Muise

* * * * *

- YOU'LL DIE BEFORE YOU GET A SINGLE CELL!!! (or at least get raped)

The well cushioned Dictator of Classification, our own beach shoe clad Deputy Denied-Oh, has raised the standards of being a prison slum lord by denying mentally ill and seriously disabled prisoners their right to a single occupancy cell. An elderly gentleman here, let's call him Dicky Shoe, has had his health deteriorate at an exponential rate since he was transferred from the gulag in Norfolk to the Death Chamber here at ShirleyWorld overseen by the Kim K. of corruptional housing assignments (just a bit longer in the tooth than Kim). Dicky had earned his single cell at the Norfolk gulag, no small feat, but when he got here to good ole ShirleyWorld that held no weight with Deputy Denied-Oh. Dicky was immediately subjected to her policy of promoting the "wolf/prey syndrome" where younger, stronger prisoners are placed in a double occupancy cell where they can "prey" on the sick old men. These ShirleyWorld suboxone junkies strong-arm the elderly all under the approval of our plump pillowed Gidget of the beach party. As she roasts a pig (pun intended) and fires up the dune clam bake, old men are forced to fork over their canteen and/or books of stamps (otherwise known as ShirleyWorld Suboxone Currency). Deputy Denied-Oh has absolutely no problem throwing an addicted junkie with his prison account frozen into a cell with an old dying man who has thousand of dollars they junkbomb can "borrow" (kind like when guys "borrow" money from the bank with a pistol). Not only does she place these old men in jeopardy but as she is an "equal opportunity abuser" she also lays the mentally ill across the railroad tracks and/or tosses them under the short bus, so to speak. We have a man here, let's call him Billy Smartin, who was raped when he was at SBCC. You see Billy is seriously mentally ill, and a perfect victim for the "wolves" around here, but our Duty Sworn To Protect Safety Deputy of the Central Mass F Troop, our own Corporal Duffy, continuously places Billy in double occupancy cells. She is doing all within her flip-flop clad power to get him raped again; and all the guards here get a great laugh at it all. Billy is walking up and down the walkways with bandages on his head, looking like a fuckin mummy, and all the guards laugh and poke fun at him. They tell his cell mate's (no pun intended) that he is HIV positive which immediately places his life in danger, but our good ole Beach Blamket Bingo Champion grins and smiles. Evil personified. In her gulag you'll die before you get a single cell - or at least get raped while waiting. Welcome to ShirleyWorld!

- CAPTAIN SHEBERT HAS "HEART EPISODE" / UNSOLVED MYSTERIES CONTACTED

Well I guess the Gold Bar wearing con-hater himself, our operations commander (Operation Hateful Failure) Captain Shebert, has some type of "heart episode" on duty. First and foremost we must mention that he steered clear of our Dr. Maria Death or N.P. MRSA Flourishes from our own HSU to assist him, hell no, he was rushed to an outside hospital where it was reported he was found wearing Victoria Secrets Pink Lace

panties and a I Heart Men T-Shirt. When they gave him the MRI and CT Scan they were all amazed that his chest cavity was empty; no kool aid pumper at all inside. It was a real honest to gumption ShirleyWorld miracle. How can a man live without a heart? Is this Oz? Are we on the yellow brick road" Maybe I just saw a Lollipop Kid, oops: It was Sgt. Young-Un, I'm sorry, but anyway: What a mystery. They sent to "Stalk"ton, California, or was it "Stalk"bridge, Massachusetts, to get Captain Shebert's medical records, but both hospitals indicated his records had been forwarded to the International Gender Reassignment Clinic for surgery screening. Our Featherless Leader, Kelly Rubberstamp Wry-On, reached out to the TV Show "Unsolved Mysteries" hoping they can assist the gulag in determining how a man without a heart can run such a large concentration camp. Lt. Smell-Her who was assigned to the SMU by Captain Shebert was hopeful that this may result in the demise of the imagined Hugh Hefner of the Greater Shirley Region as Lt. Smell-Her was responsible for getting one of Captain Shebert's "main pursuits" beat the fuck up. The good ole captain has the hots for CO Hasbeen and Lt. Smell-Her may have cowboyed himself into a corner as far as his relationship with "Stalk"ton's finest is concerned. "If it has a tail I'll chase it." is one of the Captain Crooked's mottos, along with "Never leave a man's behind." No doubt the Marine Corp would be proud if they even remembered who this guy was. We cannot forget that the department of corruption hires fools who truly and deeply hate prisoners. It's like working at the animal shelter when you hate pets, or becoming a school teacher when you can't stand children; a sure roadmap for failure. A guard has some other guard "punch his time card", gets caught, and somehow that becomes the fault of the prisoners. A drunken guard finally is mandated to rehab (think Amy Winehouse song as he don't "wanna go") and when he returns, an angry dry-drunk, it is always somehow the prisoners fault. When high ranking guards, like Lt. Shameless Peckerhead, are forced to repress their sexual orientation somehow it has to be taken out on the cons. That is corrections (corruptions) and that is MCI Shirley. Captain Shebert has a "heart episode" and it does not take Marcus Welby, MD, to figure out that it is because his sould is being eaten away from the inside out; his bile is rotting him away as his job is keeping men in cages: pure evil. Unsolved Mysteries may search for his heart but we all know that it descended to hell years ago; it is part of the "bargain" he made when he signed up for this job.

- LT. SHAMELESS PECKERHEAD DIAGNOSED WITH "FELLSHORTISM"

The Department of Corruption has been gracious enough to pay for an expert in gender indentity psychology in attempt to ferret out the deep rooted issues of their 3-11 shift leader here at ShirleyWorld, Lt. Shameless Peckerwood. Dr. Will Heswitch conducted a thorough evaluation of Lt. Peckerhead and has diagnosed him with a condition that is quite common among oxygen wasting guards: "Fellshortism". This is a condition where the sufferer exhibits socially awkward behaviors due to the fact

that they have fallen short of their goals and desires. With Shameless it all started when he "pissed dirty" for the State Police application process. When you check the "State Police Box" on the DOC application form, knowing you are dirty and continuing to be dirty, it must lend self-reflection on how fucking stupid you are. That stupidity is not a problem for the Department of Corruption, as is brightly evidenced by Lt. Peckerhead's meteoric rise here at MCI ShirleyWorld. Lt. Peckerhead grew up watching Broderick Crawford on Highway Patrol, Jack Lord on Hawaii 5 Oh, and Carl Malden on the Streets of San Francisco, but ended up being Barney Fife of Mayberry. His chronic and acute "Fellshortism" impacts every aspect of his life and permeates all his thoughts and homoerotic dreams. He is the Commander of Nothing. He is the joke of his subordinates. He is the laughing stock of MCOFU. When you know that you are the butt of so many of your co-workers jokes, that your subordinates roll their eyes as you walk away from them, and that all you achieve in life is seizing some ramen soups from an aging prisoner, it starts that erosion process that gave Captain Shebert his "heart episode." Surely Shameless has no heart, and that, combined with his Fellshortism, makes for an unhappy life. Dr. Heswitch also suspects that Shameless may be suffering from the new disease, "Bruce Jenner Syndrome", but that has yet to be confirmed. We will certainly report on any further conditions later. We are also expecting some reports from our dear friend at the Fitchburg/Leominster Inquirer.

- SHIRLEYWORLD CONCERT SERIES CONTINUES / RUBBER STAMP BUYS SUMMER FLATS

The Department of Correction has been gracious enough to continue to fund the ShirleyWorld Ivory Tower Concert Series. Our Featherless leader had some slaves from ShirleyWorld Light (the minimum) White Wash the Concert Deck like she has whitewashed the guard abuse here. She has booked Robert Plant and Jimmy Page to song "Gallow Pole" for the old men up in the HSU. Peter Frampton and the Original Humble Pie will sing "30 Days in The Hole" for the guys in the SMU. The Ramones Tribute Band will sing "I wanna be sedated" for Sgt. Bitch and Willie Nelson will belt out Whisket River for CO Scumlafia. Hank Williams, Jr. will sing his father's hit "Your Cheaten' Heart" for School Principal B. Ho-Hum and Loretta Lynn will sing "Your Not Woman Enough to Steal My Man" for his paramour Lt. Urine. The proceeds from these concerts have been divided up to purchase adult diapers for the HSU dementia patients and a color array of summer Prada flats for Ms. Wry-On herself. The Ivory Tower will be rocking over the Memorial Day weekend. Deputy Denied-Oh is assisting in booking some future acts like Bon Jovi to sing "Wanted Dead or Alive" concerning hospital patients, and The Black Crowes to sing "Hard To Handle" abotu the 3-11 shift here.

More To Come...
