

Eugenics in USA

The methods used in Executions were developed before the outbreak of WWI. It was German scientist & Doctors who created the execution protocol. In the USA mental patients were euthanized - as feeble minded damaged goods. It is a way to clean up our gene pool - thus the name Eugenics came about. It was halted when the war with the Nazi government broke out. The practice of cleaning society of a certain class of people is still alive and goes on today.

It is continued in the use of the death penalty but moreover it is astronomically used in abortions via Planned Parenthood. Its founder is a eugenisist. She believes in cleaning the gene pool of lesser minority classes.

This theme is continued in the application of the death penalty in the USA. It is grossly abused towards minorities. The clinics set up by Planned Parenthood are representative of the same racial targeting, by location. A lot has been said this year after the release of the video's about abortion clinics in Planned Parenthood. More video is yet to be released.

I find it disgusting that this is going on in our country today. As a Catholic I'm against abortion. As a death row prisoner I am against the death penalty. I have a dead relative who fought in both wars. I find it offensive the cleaning of a class of society is going on.

As an immigrant descendant (as most of us are) who hails from the Czech Republic, Polish roots - it makes me think... What would stop this classism from occurring against my heritage? We are on a slippery slope and it is wrong to kill people because they are different, culturally, the pigment of their skin, nationality or any of the various reasons in the genocide occurring in our world.

All life is precious and deserves respect.

Vote to stop the murder... USA.
