

SHIRLEYWORLD UPDATES
"Let The Bullets Fly!"
Chapter LXVIII

by Timothy J. Muise

* * * * *

- ANOTHER "CORRUPTIONAL RECOVERY ACADEMY" SUCCESS STORY / DRUGGIE TO MURDERER

The proven failure that is the Department of Corruptions "all eggs in one basket" drug rehabilitation program has turned another low-level drug user into a murderer and a life is lost in the community; so very sad. The Corruptional Recovery Academy (CRA) refuses to track its success rates so no one has anyway of knowing who "recovers" through being treated like a child over there, but we do have one sure way of tracking men who have gone through the program; and that is by watching the 5:00 pm news. Most recently we saw James Ferguson, or Fergie as he was known when he was here at Shirley-World not too many months ago and attended the CRA, who has been accused of killing another human being in Marshfield. Fergie was an enrollee in the joke that is the CRA. This is a program where entry level, unexperienced "kids" are hired to attempt to treat the complicated addiction/dual diagnosis demographic in our vast society. It would be like NASA hiring Mrs. Smith's Third Grade Science class to work on the next Space Shuttle. Certain and utter failure. The Corruptional CRA employees have no real life skills, most are just kids, and the pathology of power with that youthful mindset takes over. They attempt to humiliate 40 and 50 year old men with deep rooted criminal thinking issues. How's that working for you? Just ask Fergie. They start to "think like cops" (these employees) as they are around the oxygen wasting guards all day long. The female employees dress in skin tight clothing and have men salivating, especially the guards, at their heels. The oldest member of this "crack" recovery team (pun intended) dresses like a clown each day. He would be better suited sitting in the "Dunk The Clown" tank MCOFU rented for their "Hot Dogs The Long Way" annual picnic. Drug use and its root social causes is one of the major factors behind crime and poverty. The DOC puts in place this CRA which uses a therapeutice treatment philossphy which can never work in the prison setting. You cannot expect men to change in a caring community setting when they are released out on to the pathways of the evil prison each day. Reprogramming can never take place, but as with all things in "Corruptions" they place an ostrich head in the sand and wheel their barrows up to the bank window to collect their blood money. These paychecks are now stained with the fresh blood of this poor victim in Marshfield and the workers in the CRA program hope someone will drop a note so they can give Fergie an intervention while he is caged in the County Jail. Fucking crazy. They should stick to worrying about who used their tables and chairs, which is another "truth is stranger than fiction" story, as that seems to be all they really care about. No wonder they don't track their success - they would have to track it straight to the morgue.

- THREAT LEVEL "RED" AT SHIRLEYWORLD / FIRE DRILLS LEAD TO NAP TIME BLISS

If you thought that the drought in Southern California would lead to the highest geographic fire risk in the good ole US of A than you would be wrong - oh so wrong. It appears that the area with the greatest risk is confined within the perimeter fence of ShirleyWorld and these red nosed

buffoons are truly taking it seriously. You see they are running two or three "fire drills" a day here. What these drills consist of is to first lock all of the prisoners in their cages where, if there was a fire, they would surely burn to death. Then the dolts who wear the badge grab an oxygen tank and fire extinguisher and proceed as slowly as possible to whatever "Code Red" (no not Lt. Urine's lady parts) area the Big Chief Mucky Muck Captain has declared an "emergency". If you could see how slow these You Tube watchers move you would be amazed. It is like they are encased in that putrid jello they serve us in the chowhall. They all split hoove it over to the "Code Red" area, high five each other for locking us in our cages, and then head back to their posts where the ultimate goal of the drills unfolds: It's "Nap Time" Baby! They take as much time as they can get away with and the boots go up on the podium, the hats get **slumped down** over their eyes, and off to dream about men in wrestling singlets and kegs of cold Piels Real Draft they go. If the drill takes place at night; let's say around 9:00 pm or so, we all know that we can just tuck ourselves in until tomorrow as they ain't busting the cages open till then. Many nights when they have such a late drill "the card game is on." The dolts gather in one unit's "Caseworker Office" and place a opaque plastic trash bag over the window so that the Captain cannot see them on the camera. The deck then comes out and their own little taxpayer funded Monte Carlo night begins. It appears that some of the toughest beat in the state walkers play a bit of "strip poker", with "poke" being the operative word, in this offices as when the fully unqualified "caseworker" comes in the next morning he has to call one of the Stockholmed block slaves over for a "mop up on aisle nine". This can be a sticky business this corrections! This Threat Level Red here at ShirleyWorld should be applied to the recidivism rate, but they do not care about that. This is clearly a jobs program for dolts funding by the taxpayers of the Commonwealth. These guards seem to forget that their jobs entail keeping human beings in cages! It is sadistic, but they make up all kinds of propaganda about "public service" and "walking the toughest beat in the state", while they booze, nap, and drug their way to hell. I'm sure there were many Nazis at Auschwitz that felt they were "walking the toughest beat in the state", but we all know who they really were. Public "servants" do not bitch and moan about having to stand up, as these guards do each day. They want to nap and drink while collecting their checks with ski masks on in the modern version of the Brinks Heist. Well we have our own little Code Red here at Free Speech Central and that is to ring the alarm of exposure! No more hiding our in the woods of ShirleyWorld! Welcome to the Information Age! Viva Free Speech!!

- HAT TASK FORCED LAYED OF FOR THE "SEASON" / THE ELDERLY CLAIM VICTORY!

You cannot know how happy we are to learn that the "Winter Hat Task Force" here at ShirleyWorld has been "put on ice" for the season after a rowdy gang of octogenarians lobbied for Americans With Disabilities Act protections so that they could wear the winter hats on the bitter cold

days we have had lately. In their typical sadistic and cruel manner the pigs here have been ordering 80 year old plus men to take off their winter hats on the way to chow in the morning. These are the same pigs that are wearing their winter hats inside the chowhall! Like I told you before the truth in here is stranger than fiction. These soulless bastards have no problem telling a dying old man that he must freeze on the way to pick up his daily sustenance. They view us as less than human, and we know it is a must in their line of work - keeping human beings in cages -, but you would think they could draw the abuse line somewhere? Absolutely not!! They actually take pleasure in abusing these old men and make jokes about it in the chowhall. That is who these bullies pick on: old men, the sick and dying, and anyone else they view as weak. Fucking cowards. Some of these old men got smart and submitted Americans With Disabilities Act requests to Our Plump Dumpling of a Deputy, Field Marshall Denied-Oh, and she saw the writing on the wall. She knew these guys had a legitimate beef which would prove embarrassing when they "took it to the next level" so she had a "memo" issued that all prisoners could now start wearing their winter hats, rather than wait until December like the abusive jackboots were telling these old men in the mornings. Each and everyday here at ShirleyWorld is something crazy like this. You would not believe how they just have to abuse those in their charge. No just doing their jobs, they have to make sport out of abusing folks and that is a major aspect of what is behind the 50% recidivism rate they produce at this godforsaken gulag. Just imagine, on a cold October morning you see an 83 year old man making the 100 yard trek (one way) to the prisoner chowhall and you tell him to "Take off your hat!" as you stand there with a winter hat of your own on??? It takes one sick son-of-a-bitch to roll with that. People sometimes wonder why these fuckin' turnkeys are known as the "scum of the earth and the dregs of humanity", and if this don't let you know why I don't know what will. When Nazis led Jews into the ovens they claimed they "were just doing their job." Well that same bullshit excuse is what these lackies profess. It is bad enough that you keep 80 plus year old men in prison, says a lot about our "modern" society, but then you have these compassionless bastards poking them with sharp sticks every chance they get. You should see the glee on Sgt. Bitch's face when he "orders" a dying old man to "Take off that hat!" Karma for Sgt. Bitch and his cohorts is on the way (and in many cases has already arrived). "Walking the toughest beat in the state." takes on a whole new dimension. If your drunken ass makes it to old age I am certain some sick nursing home employee at "Shady Acres" will be giving you guards the old "Flesh Baton Enema" as your payback and it will be well deserved!

- NEW CHOWHALL TO BE BUILT / GOVERNOR AWARE OF "OVERTIME REQUESTS"

Well due to the Exercise of "Free Speech" we forced the gulag to build a new chowhall as the one we have has failed the Department of Public Health inspection reports for the past several years and we sent

those reports, along with the DOC's "total lie" corrective plans, to the right powers-that-be who made the gulag build this new slop-hall. It typical DOC fashion the layabouts are openly discussing how they may be able to "squeeze" overtime shifts out of the taxpayer through the building of this new structure. Now don't be folled, no guards will actually work - they never do - they will just stand around complaining while others do the work, but they will in fact do all within their power to have the union advocate for "O-T" shifts, but little do they know that Free Speech Central is already on this quest. We have supplied information to the office of our new governor, Charlie "Young-Nazi" Baker, to let him know - in advance - the guard's plans. Our hopes are that he will put the kybosh on any "O-T" plans these "O-2" wasters may have, just as he did when Commissioner Wiggins Oh-Cryin tried to relocate Deputy Denied-Oh and Deputy McCan't. For years these guards and suits who hid out in the deep woods of Shirley did not believe that prisoners could ever effect real change but they are finding out different! Free Speech is making change! Their actions are being exposed and their lunact addressed. We now have the legislature watching and the media listening and trust me when I tell you there is more to come! Viva Free Sppech! Long Live The Free Speech Warrior!!

- WINTER "CLOSE OUT" FOR THE IVORY TOWER CONCERT SERIES

With the rapid approach of the Winter Season our Fine Feathered Leader, Kelly Rubber Stamp Wry-On, has announced the close out concert for her Ivory Tower Concert Series - Live From The Alabaster Deck. She has booked the band Foreigner to sing their hit "Your as cold as ice" for Deputy Denied-Oh, and their hit "Hot Blooded" for Lt. K. Urine. She has also booked Cheap Trick to sing their hit "Surrender" for the guys up in the Hole who won't come out because they cannot face another day here at ShirleyWorld. Other bookings include: The Fabulous Thunderbirds to sing "Tuff enuff" for Lt. McHardly to beat handcuffed cons by, Donovan to sing "Mellow Yellow" for Lt. Peckerhead to piss out dirty urines to, The Outlaws to sing "Green Grass and High Tides" for CO Scumlafia reassignment bitch lawnmower service, Molly Hatchet to sing "Flirtin' with Disaster" for the CRA Staff, and The Doobie Brothers to sing "Black Water" for what all the prisoners here have to drink while the guards are provided with spring water. It should be a great close out to a long concert season. It is also rumored that CO Hasbeen may put on a duel "Power Lifting / Striper Pole" aerobics performance with Lt. Shameless Peckerwood swallows all beef hot dogs whole. It should prove quite a day! Can't wait for next years series - Live From The Alabaster Deck! Bravo!!

More To Come...
