I'm "Pro Choice." Women have been exploited and dominated long enough. How stupid to try and rationalize the pro life stance to the point of taking radical-terrorist actions against women and their doctors?

Stop the Madness!

Fight for Freedom instead!

- Freedom of Choice.
- Self-determination.
- Small government.
- Free education.
- Free health care/prevention.
- Free us from mass media controlling perspective.
- Free us from Donald Trump.
- Free us from the Clintons.

Any more suggestions?

Do All Lives Matter?

Do they really Matter?

If so let us who hold this truth to be self-evident make a pact to take actions conducive to bringing about more equitable conditions for "All." Let us begin to set in motion de-capitalization models; or systems that make it illegal to oppress, exploit or capitalize off of another for the benefit of yourself. Fair and equitable trade amongst consenting parties based not on corrupt standards or laws staggered to benefit one party at the expense or deprivation of the other; but true equality.

Any suggestions?
