JUNE 27-30, 2016

monday June 27,

Got up at 4am. I didn't get to sleep until after 9:30. was waiting on weight and bar check. It was also very hot. The Florida humidity is what makes it so bad down here, I need to get some writing done today. Need to send out a few cards. I'm hoping to see the doctor this week. only thing the doctor likes about my test results, "is there not his ~~is~~ ha ha ha! This shoulder is causing me a lot of pain. I'm falling apart.

word is there's a tour group coming through from Tallahassee, so every one sgt., EOs are on panic mode getting everything straight. Canteen came. Didn't get everything I wanted. Things are kind of messed up around here right now, Financially, oh well, it'll improve eventually. at least I hope it does. It's so hot in here!

Tour group went down stairs on the and Floor, they very rarely come up here on the 3rd Floor. This building is set up, where the First Floor is actually the Basement. When you walk on the wing through the Front door, your on the 2nd Floor, the visiting park, Clinic Chapel is all on the 2nd Floor. The execution chamber is on the 1st Floor. This building is set up weird. It is so hot in here right now. I did fill out another sick call slip, I've got to get something for this pain. Did some push ups today not good for the shoulder. Well no mail tonight. Unbelievable not getting any mail. It is never been this bad, maybe I should go back to writing sex letters. I took a late bathe, I'm going to try to go to sleep. It is hot!

TUESDAY JUNE 28, 2016.

I'll be going to see the doctor this morning. Glad of that, this shoulder woke me up several times last night. DONALD TRUMP for president, yes - a reality T.V. star as the U.S. president. You think the Republican party could do better than a reality T.V. star. This country is not in good shape. I can see it collapsing especially with BREXIT.

Back from seeing the doctor, got a steroid shot in my left shoulder. Feels like someone hit me with a baseball bat. I just hope it helps. I'm just trying to deal with this soreness.

Went out to recreation and just walked back and forth talking with saint. I feel sick to my stomach. Probably this steroid. Shoulder is still hurting. Doctor did say it was going to take several day's for it to start working.

Got two cards in the mail tonight. also finally got taken OFF the vegan tray. Just got back from the shower its 8:30 P.M. and I'm going to sleep.

Wednesday June 29, 2016

still feeling sick to my stomach. Something caused this guy O in cell 2311 to snap on the sgt and co. now he's down there flooding the hall way. The sgt hasn't come down to see it. They're pulling recreation down stairs. I see all hell breaking loose here shortly. He may get gased. All I know is it's going to get crazy around here soon. These guys on this side are mental cases. Well here comes the sgt. And this sgt here is very laid back. He just walked right by the water

and didn't say a thing, as he walked OFF the wing, the CO. said, what's he throwing water out there? Sgt. said "yeah". And O is still throwing water out there. I figure the Lt. or captain will be up here shortly. I wrote one letter and was washing some clothes. I need to write one more letter.

Ms. Sagle came down and told me the FDOC has denied me of a GED. O was yelling down calling the officer names.. The other CO. came down and had the runners mop up the water, O then went to saying he's going to throw some piss and sh--. He's done stupid crap like this over and over again and yet they don't write him a disciplinary report. I don't understand that.

Nothing ever happened with that incident down the hall way. We have been told that we have to wear long pants and shirt here in this cell. I'm none too happy

THURSDAY JUNE 30, 2016

wrote a 4 page letter to the warden this morning concerning wearing these pants in these 100° temps. I'll be posting it on the blog. I'm sending it out tonight to have copies made. The letter will be sent from the street. I'm getting copies to be sent to other people to ask for their help.

Went to recreation this morning & exercised pull ups, dips, push ups. shoulder still hurts. Nurse said the steroid treatment last 5 days so until Monday. I hope it helps, I just don't have a lot of faith, because there's a lot of pain there in that shoulder. Hope they bring in a better doctor, or one as good as Doctor Miller

who ~~is~~ just seen. No mail last night, maybe tonight. Need some one to write over this three day weekend. Wish ~~I~~ had a visit for all three days. and with a woman. Yes that would be nice.

They never wrote a disciplinary report on O' ~~I~~ don't know why or how he gets away with what he does, but he would never get away with that at UCI. He would stay on disciplinary confinement.

I'm really tired. Been up since 3am. I'm going to bathe here shortly and get into bed. It's a bit hot, but not as humid as it has been.
