- SHIRLEYWORLD CONTINUES TO EMPLOY MURDERERS/IPS TEAM SCRAMBLES FOR COVER

The former commander of the IPS Team (what a fucking joke) and current deputy of operations, along with his psychophant sidekick sergeant of the IPS, were directly responsible for the murder of Scott Rose. You see the commanding midget (now deputy) and rotund sergeant went to Scott's mental health clinician and "ordered" her to take Scott off of his effective anti-anxiety medication. Scott then chose to hang from a bedsheet tied into a vent rather than live another day under such barbaric abuse. I will never let it go.

When I got the chance I let members of the state legislature know about the murder, right in front of the nazi-sergeant himself. These cowards took a young nazi, still wet behind the ears and angry about being bullied in high school, and sent him after me to set me up; this fool came up with "a plot to build a computer" and now his career is in jeopardy. The IPS Team of cowards, led by a lieutenant who locks up his own - the Benedict Arnold of corrections - are panicking over the "Discovery Requests" and "Evidence Holds" my legal team are requesting. The Attorney General's office is overseeing the matter and these fools will pay a price for attempting to silence my voice; it is what it is.

The midget, the rat, and the plump pussy, all conned Tommy Perriwinkle into doing their dirty work - true cowards - and when the shit hits the proverbial fan he will be tossed squarely under the bus. What a fool! He who laughs last, laughs best, someone once said, and I plan on having a real belly-howl down the road.

More To Come...
