

## MUSIC IN MY EARS

June 10, 2016

If you did not know, I absolutely love music! Music is playing in my ears nearly 24/7. Music is a huge part of how I do my time. Here's a list of some of the music I am currently listen to. You can learn alot about me via the music I listen to!

But first, shot out to Rappers "Nipsey Hussle" and "J. Stone". It is truly extraordinary what they are doing in the music industry. I came from the same streets as them, and I personall know J. Stone, so it makes me extremely proud to see them over come the odds. Their "All money in" record label, is being ran by a bunch of intelligent gangmembers, who found away to turn gang life into a success story. They woke up and learned selling music was smarter than selling crack. It took awhile, but now they are enjoying the fruit of their labor! The best part of their success is, "it is legal success!" No need to be looking over their shoulder, worrying about the police kicking down their door, and taking their money. I learned from them, and I hope some of you street dudes out there take a page out their story. Find a way to go legal, because when you dead or sitting in one of these cages, it will likely be to late!

<u>ARTIST</u>	<u>TITLE OF SONG</u>
AUGUST ALSINA	HOLLYWOOD
