Loud & Clear!

By DeVaughn

491 people killed! Between January and June, a lot of lives lost, yeah! they died way too soon. Government on high alert, protestors filled with malice, it is a tragedy, at what happened in Dallas. Police abusing their power, taking lives of the blacks, people are fed up, so they launch ambushed attacks. will they ever learn, when they kill blacks in the streets? we protest to change policy, saying we're all about peace. it only takes one to say, that's it, take law into his hands, pull out guns, that they grabbed from their waistband. It's despicable! but I guess you can blame micah, to arm himself up, and become like the American sniper. Lets face the harsh reality, they kill us, we bow in silence, they'll never change policy, after they see more violence. 105 of police killings, have been caught on video, police pulling triggers back, hm! trying to be a hero. officers are sworn to protect the law, lay in their lives on the line, but kill unarmed black men, every single time! what does it have to take, how many blacks have to die? before they say enough is enough, and start asking why? why you unloading the clips? and shooting at unarmed people? why charges aint being filed? I guess justice aint equal we want change, but what if change don't come? what will we do then, officers will still shoot their gun. They got body cameras, but lets lay the facts on the table, you cant gather the facts, of a shooting, if the cameras disabled.
