I RESTORED WETLANDS HERE

AND LEARNED OF A AFRICAN  
Mosquito APPROVED by OUR  
WISCONSIN'S DEPT OF NATURAL  
RESOURCES (IN MADISON WI) FOR  
RELEASE IN OUR STATES AREAS  
THAT HAVE PROBLEMS WITH THE  
49 DIFFERENT Mosquito SPECIES

BUT THE AFRICAN mosquito  
ISNT A BLOOD SUCKER, ITS GOT  
A SWEET tooth! it only -  
DRINKS NECTAR. BUT IT EATS  
ALL VARIETY(IES) OF OUR Mosquito's  
HERE IN WISCONSIN

Also the African Mosquito  
LARVA (WRIGGLERS) DIE SO FF  
ONCE THE WATER TEMP REACHES  
45°F.

THERE WOULD BE VIRTUALLY  
NO NEGATIVE IMPACT ON THE  
FLORIDIAN ECO SYSTEM SINCE  
THIS AFRICAN MOSQUITO WOULD  
REPLACE NOT DISPLACE THE  
BLOOD SUCKING MOSQUITOS NOW  
IN FLORIDA SO DRAGONFLYS, BATS  
AND SWALLOWS WILL BE SAFE

This also could be RELEASED  
in BRAZIL AND stop ALL THE  
CHILDREN ~~FROM~~<sup>R</sup> BEING KILLED  
by THE ZIKA VIRUS
