

Where is our children

Getting these Guns

From? etc conversation about all

The answer is right under your nose. I think sometime we ask questions. We don't think about. Don't get me wrong no question is stupid. Let's get right into this. If I am in a gang. I can get anything I want at any age hence I have showed the gang leader. I am trustworthy and my ~~rank~~ higher rank. Then my leader can tell others on the street that sell drugs, hook up with prostitutes, guns or anything else I desire. Hey, he or she is straight. You have children that has been in Gangs every since they was 9 years old because why they made them feel worthy or someone in their family introduce them to this life style. This all they know. But that does not give them a license to kill, sell drugs, guns, run prostitution ring or take over your neighborhood absolutely not. I remember back in the Day when I stayed up north. The law enforcement set up a sting. Guess what they going to get you. I love the way the New Jersey and New York Law Enforcement work together on big issues. They sift through every person on the street. Even if they have to arrest everyone hanging out on the block. Up

North we call it a sweep. Some people got caught on camera selling to a lender cover cop. There was warrants served to search housing in the middle of the night. One thing I've learn about street life is. you can be in a gang, drug dealer, running prostitution ring, gambling house basically doing anything illegal with others. Somebody in your inner circle is not trustworthy. There's going to talk we call this snitch up North. In order for the murdering to stop. you need cameras on your blocks to catch these criminals in the act. you have to start small in order to get to the big prize the gang leaders. By setting up sting operation to arrest for drugs, carrying, robberies and drive by shootings at the earliest stage so a lot of people want end up dead like they are in Chicago. I promise you when you arrest a whole lot of people off the block. somebody gonna sing like a bee because they don't want no bid in prison. one ~~one~~ of the main ways to get into a gang is drive by shooting and robbing. If people are randomly being shot, killed and rob is because somebody is joining the ~~game~~ gang. The only thing the gang leaders and members care about is dominating and making money. Sometimes they don't care about each other. When one cross the line of disloyalty to their leaders. They will kill they own. Where I stayed at in New Jersey was a rough area.

Things got so bad we as teenagers had a curfew. We had to be in our house at 10pm. If you have something going on outside the home, your parents had to be present with you. Even the adults couldn't hang on the corners. If they was out there, the police wanted to know where are you going or what you doing. The repercussion of violating this curfew, your parents will be coming to get you from the jail. If they don't come to get you, you will be shipped to a detention center until your juvenile court hearing. I had never been to juvenile hall. ~~But I remember~~ ~~But I remember~~ But I remember when I stayed in Georgia my ma's put me on probation for 90 days for my disobedience of talking back and not washing dishes. I had to go see my juvenile probationer officer once a week. If I violate my probation this would have ~~be~~ went on my record and I would have went to juvenile hall. Then my Aunt was a juvenile Detention officer. She would talk about how the children was, what they would do to each other and to the officers. So I was very scared to violate my curfew in New Jersey. So I stop my egging - throwing eggs at people cars and homes. I stop sneaking out of the house etc. Because I was bad growing up. Behind my ma's and dad back. But in their eyes I was a angel. Cause I appeared not to be any trouble.

Because I showed my stepmom and dad respect. But this neighborhood I stayed in consist of drug dealing all day and night, alot of cars in and out of the neighborhood. People playing Craps on the corner (gambling) all day and night. Before I left in 1993, The law enforcement did a humugous sweep. Their was alot of arrest. Was no longer all that traffic in and out. Because they knew the block was hot. The curfew was not just for the teenagers but also for people who get caught on the corners. They went to jail as well because cops want to know why are you on their street violating their curfew. Their was no more drugs ^{dealing} on the corner and no hanging out. It was like a Ghost town out there at night. Then the same people took the behavior to another side of the town. The law did a sweep over there and curfew in shut it down. Some of the same people from the last sweep got rearrested and put in jail along with the new people that had joined them in their criminal activities. The ones who violate their bonds didn't get on out. The ~~law~~^{Judge} said as a matter of fact we gonna send you to prison for a long stretch. Basically I am going to show you who own these streets, we do. Their is a solution to every

problem. It's just sometimes we don't think. We get caught up in the situation, man this is too difficult to solve. We thinking we don't have the financial abilities. Sometimes it's not a financial problem. It's us not thinking Police Sheriff and OLA etc. team up together with other counties or states get your neighborhood back. There needs to be a curfew for teenagers and the people who are hanging out on these blocks late at night. Selling drugs in and out these cars. Prostituting and robbing etc. you say this is easier said than done. you say well there are teenagers that have practice and games. This is how they did in Jersey. If the parents can't bring them home. Why is the school not doing it? We had a big ole yellow bus called bluebird that brought you home from not just school but late classes, games ~~and~~ ^{and} practices. Up north when you was finish with your regular classes. you could all stay for study hall and extra classes for extra credits. for people who don't know what study hall is you have a teacher who stays later to help you with any subject. you having problem with. I want to reflect back to when I went to the military ball. My date ~~at the~~ Sean's date was with him. To make a long story

Our dads brought us to the military ball. They left us behind. Each one of our parent told us what was required of us. We had a good time. When it was almost over. We called our parents to pick us up. We went home without anything happening to us. This was 1992. Now we have parents that feel they gotta give their teenagers all this freedom. These teenagers get all drunk and drugged. Some of them never make it home from different functions safely. All because we want to give them all this freedom. That's the problem with the teenagers of this era they are getting too much freedom. Let's even reflect back to my job at McDonald in New Jersey. I was a teenager working with a work permit at first. Mind you I am teenager there is a curfew. I cannot be caught on the street walking. Because I can go to juvenile Hall. So how was this issue resolved. My dad came to pick me up faithfully. Well I don't have a dad or anybody. If you in the city. You can ride the bus. When the officers in the neighborhood, he would say where you all coming from. We would say nicely Sir or Ma'am I just got off from work. It's all in the way you talk to others.

for me if I had to walk. They would have seen I had a McDonald uniform on. But ~~my~~ I respected them even if they asked. My dad was protective of his children especially his girls. He believed that a young woman shouldn't be out there on the streets any how. Because not everybody minds are not in the right place. We need to stop making up excuses to why things cannot be done. When there are a lot of solutions to our problems. Camera in light ~~poles~~ poles on each street are very important. This what the counties need to be spending money on. So when people commit crimes and think they have gotten away with it. you will have proof. These camera's need to be on these country roads. Where there is wooded area. This is where a lot of criminals like to go to commit crimes or carry evidence because they think nobody will ever ~~find~~ find out. Because they go into a wooded ~~area~~ area they have to drive on a regular road and then turn off. When they go onto that road. you can at least identify the vehicle. With a person expertise someone can add something to the technology of the camera to zoom in on the tag. you will have a camera security room with TV to be able to keep tag check. There should be some type of sensor on the system. To alert their

trouble in that area. The screen should take you to that area where that crime is happening. Immediately it should jump up on the security room television. Every Sheriff ~~and~~ police and State Troop should have this system at the station. By zoom in on the tag. You can identify who the vehicle belongs to or was it stolen. Not only that the law enforcement can get the faster while the crime is being committed. In this can prevent a lot of cases from becoming cold cases. This is just my view being in Georgia I have never seen so many clubs without cameras or even some places of business. It should be mandatory that clubs have cameras on the inside and outside. Because of the mass of people there the clubs and all the business I went to in New Jersey had cameras. Even the streets in some place has cameras. So they know what is going on in their neighborhood. This is just my opinion. It's like everything down here and some other states ~~are~~ are behind. (No you're not in prison and I understand you don't need nobody watching your every move because you're grown you shouldn't have to live like that but the mindset of people in this era is becoming more unstable. The importance of all this (saving lives) so

you have to upgrade security for the safety of the people. That leads me to the question why are we selling military or similar weapon to citizens. These weapons are not even fit to kill the animals we eat everyday. These weapons are inhuman and repeatedly use for the wrong reason. I think every military or similar weapon should be remove out of these gun store. The only people should have these guns are military. If these guns are removed out of the gunshops and off the streets, you can minimize the situation with these other guns as well. Well, Cause even our local law enforcement can get carried away with these weapons. The weapons has proven to be detrimental to the American people because they keep getting into wrong hands. After my cousin Marcus was killed September 14, 2015. He was shot three times. I was willing to forgive the person when they find him. Because at first all we had was a nickname. They did find him after he had shot another girl five times. My natural human emotion kicked in fast gear, no I didn't nothing out of character but I was so angry because so many things could have been done different in this situation. That could have prevented the second death. I was so

I thought about they should take up all the guns off the streets no citizen have guns, out of anger. My friend that stays in Fiji Islands said the citizen are not allowed to have guns. Only the police is allowed to have weapon. Then I thought hell that won't work because we in America. We have a right to bear arms under certain condition. I said to myself hell the cops is killing as well. So this was no win situation unless they change the gun laws and get these military weapon out of these gun stores. Tighten up the rules in these neighborhoods. But yes I was angry about my cousin death. I am sure alot of us American are. That is why something has to change. My final subject I want to discuss is. Any where guns are sold. There should be extra security measures. Burgular bars on the windows and doors. A ex-school teacher of mine has burgular bars on her home windows and doors. She has never been robbed. Some people have them on the air condition to keep thieves from stealing their copper. I also know a guy who own a barbeque pit store. He has never been robbed. He's family business been operation 45 years. Thieves don't waste their to get into places like these. They may try to rob during broad daylight

When the business is operation. But not at night. A burgular bar is not easy to get into. I feel every pawn, gunshop and liquor store should have these burgular bars, put on their store doors and windows' to keep the thieves out from stealing these guns. Nobody should be able to break in anything of yours that easily. We have to protect our stuff, (the proper way).
