

THE NORFOLK CHRONICLES

by Timothy J. Muise

* * * * *

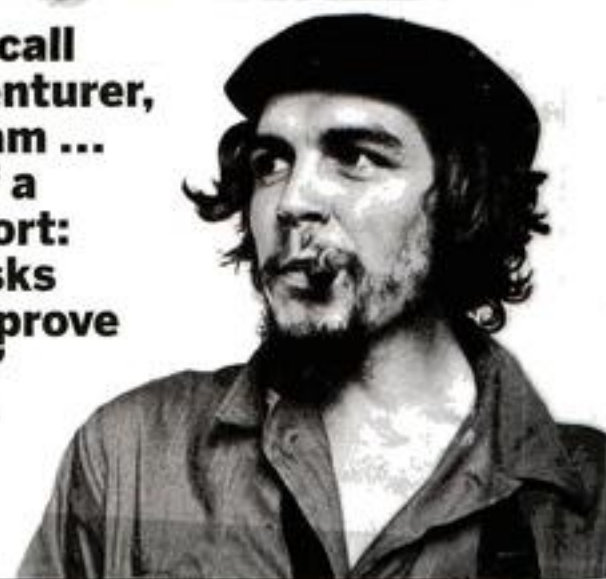

- MOVE INTO THE "WAR ZONE" OR ELSE! NORFOLK WORLD DRUG TREATMENT

In more than typical DOC fashion that former "Rehabilitation Model" that was MCI NorfolkWorld now employs an abusive "Program Enforcement Strategy" of PES Program. What this abusive program entails is a policy that if you refuse to be subjected to a "voluntary" program you are then forced out of your single occupancy cell, your job is taken away, and you are sent to the "Probation Unit where K-2 Synthetic Marijuana is smoked all night long while the guard sleeps with his feet up in the observation bubble. The DOC receives enormous federal funding for their all eggs in one basket druge treatment program, The "CRAP Program, and they force men to enroll in this "voluntary" program by using PES consequences as a threat. The Unit where the CRAP Program is housed has the highest instances of drug use, the most dirty urine tests, and the greatest amount of cell thievery, but they make the men "chant" a "philosophy" of recovery and behavior modification which obviously no one in the program is following as it is the worst program in the joint. You cannot believe the fools who are still wet behind the ears, just out of community college, and think they are going to be able to counsel and cure a convict who was burnt with cigarettes as a child, or raped by his crackhead mother's boyfriend. It ain't gonna happen. This insane gulag now forces men into this incredibly failed environment through threatening to ruin what has been working in their sentence. They take a man learning a great work ethic and have him fired from his job. They take a man who is a model prisoner in his housing unit, years of positive unit reports, and move him into the probation unit where they smoke the K-2 all thru the night. This is modern Norfolk, this is the madness that is modern corrections. These gulag suits absolutely sit down and plan how to ensure men will return to prison. They do whatever they can to ensure their job security, while actually ensuring that there will be more summers of murder in the inner city. You pay these "jailors" untolled sumsto diminish your safety and it all must become unacceptable to you. Hear these truths we tell here at Free Speech Central and get involved!

WARNING

"Many will call me an adventurer, and that I am ... only one of a different sort: one who risks his skin to prove his truths."
