Hello Alyssa,

First things first, thank you for responding to my response to your letter because you are the first person to write back and I have been on the between the bars website for over three years.

Alyssa you asked some really good questions and I am glad that my answers might have helped you. So let's begin with your new questions ....

1st question Is it unhealthy for human beings to not have any form of sexual release / pornographic material

Of course it is unhealthy, human beings have three core functions Find food, find shelter and find a mate, in prison all three have been taken away from us, C.D.C.R gives us shelter, food but allows us to interact with unattainable C.D.C.R women workers, its torture and very cruel.

part two of first question

As a C.D.C.R inmate I can no longer own photos of any naked women including photos of your own wife. Once C.D.C.R took away the naked photos people started companies that began to see photos of women in bathing suits, bra and panties etc I collected baseball cards as a kid so it was the same type of thing just creepier". If you get caught with any pornographic photos the correctional officer will issue you a rule violation called a 115, once your found guilty then the Lieutenant

Can and most likely will take away the following quote, unquote privileges . . . . dayroom, phone calls, yard, packages, store and can make you work at your job but not pay you for upto three months and all of this can happen because I want to look at a naked female picture. people turn gay because they are lonely, for lack of a better term horny and desperate to feel the touch of another human being. As for me I dont like it when people touch me because I dont know what the other persons motives are. plus every single man touches his penis through out the day and some dont wash their hands.

Do conjugal visits help C.D.C.R control peoples behavior?  
 Yes!!!! C.D.C.R took away the family visits from lifers about 20 years ago and the violence exploded on the yards, There was no reason to program and follow rules. Now when a lifer is told to go and stab another inmate or guard the prisoner will think twice, go on a family visit with your wife, kids, mom etc or go do a security housing unit "shu term" for five years. Also the prisoners with sex crimes such as child molesting and rapist are not permitted to have family visits.

Does the prison look down on masturbation?

Yes, people have gotten their third Strike "Life Sentence" because they were caught masturbating. Don't get me wrong some prisoners have exposed themselves to female guards and staff because they are creepy bastards. The prisons in California now pass out condoms but the motto is  
No means No  
And yes is not allowed.

Great questions Alyssa. Thank you for saying you like to read my blog. If you have any more questions please ask. I would really like to read your paper but at least let me know what grade you got

Sincerely

Roland 2/21/17
