

NORFOLK WORLD RENAMES IT'S HOSPITAL UNIT  
"The Dr. Kavourkian End of Life Death House"

Our Governor has approved the proposal of the NorfolkWorld "Angel of Death", HSA Stephanie Bygones-beBygones, to rename the hospital unit. The HSU will now be known as "The Dr. Kavourkian End of Life Death House" offering an assortment of euthanasia options for the octogenarians who dare to get sick while in DOC custody. "Steph of Death" will allow Firing Squad, with one Marlboro Light cigarette, or Hanging From The Gallow, with a last meal of The Green Chickenhead's Chicken Stew, or Lethal Injection with a combination of guard lugged suboxone and K2, with a blindfold, or Death By Gas Chamber where Scary Sherry's panties will be immersed in amonia while a Priest says the last rights. The old and dying cons will be able to "pick their poison" unless they are too far into dementia to know what planet they are on; and in that case Bobby Reeses the Fleece will spin a "Death Options Roulette Wheel" while dressed as Vanna White from Wheel of Fortune. Hep "C", MRSA, undiagnosed cancer, never you worry, there will be a way out. One last option will be offered for those who have been PESeD and are not allowed to go to programs. It is the Jack Nicholson Memorial Last Gasp where Recreation Coach Janey's Got A Gun will hold an industries made pillow over the face of the prisoner with Zena the Warrior Princess (called "Hoover" by the rest of the IPS Team) will offer a three count. God rest their souls up there...
