Mind Shifters

We are mind shifters

Transforming and conforming

Perceptions we adapt and abandon

Life is hypocritical

Allowing us to evolve

Giving birth to individualism

Maturing into our own identities

Learning and knowledge is growth

The purpose of our existence

So we shift within our conscious

Paper is no longer a peice of paper

Witnessing the source

From a tree it evolves

This is call, "vision with sight"

Growth of the mind

Allow's us to truly see

Mental stagnation keeps you still-born

Being constricted by a immature will

Will allows growth mentally

So it shifts

Conforming and transforming

Until you become, "You".
