**Free as a Bird** by Roger (Hari) Feit

Years ago, my wife and I went to a library lecture by an ornithologist, a scientist who studies birds. He showed slides of beautifully colored birds that he had taken over his lifetime. You could easily tell that he loved the study of birds...it was his deep passion and he shined when he talked about them.

I had been introduced to bird watching by my wife at the time. She was a nature girl and especially got off on birdwatching. She was an artist by profession and was paid to do many drawings for nature journals. She learned her craft (under the wing) of a world renowned ornithologist. It was a lasting gift that she gave me. My favorites are birds of prey, especially hawks and falcons. I always carry my binoculars in my truck and pull off the road to watch an interesting bird that I spotted. I have seen eagles, peregrine falcons and many types of hawks close up and personal many times. It never gets old for me.

Crows seem to follow me everywhere. One day after meditating I looked out my window to see what was making such a racket. It was three crows serenading me. I thanked them and asked them to fly up to the window and say hi. When the first crow did just that I was frankly surprised and somewhat befuddled, but when the next two took their turns to fly within a few feet of where I was standing I knew I was experiencing a sign from Source.

Another time, while I was walking my dog, three crows followed us as we rounded the block. That same day I had to go to Staples, so off I drove in that direction. As I passed the edge of town three crows flew across the road in front of me. I thought about this for a while as I drove to Staples. When I got there, I got out of my car and looked straight ahead for Staples. I wasn't quite sure where it was located in this shopping center, for I hadn't been to this store in a while. Then I heard a weird noise coming from west of where I was standing. I looked in that direction. It was a crow making a different noise (almost like the cry of a seagull) from any I had heard before. He was squawking, perched on top of the Staples sign over the entrance. I walked to the entrance and did my salutations and passed under him. For some reason I thought he was going to drop a poop on me just to be funny, but he didn't.

*Meditation Mantra* — ancient Hindu mantra

**Om namah Shivaya.** *Om Salutations to the one who makes everything a blessing.*

**Free as a Bird**, continued

Getting back to the lecture, the speaker was taking questions from the audience. A young girl asked "Why do birds sing? His answer was a simple one. Birds sing because they like to.

I once read that birds are here to remind us to connect to joy...to Bliss...to Source.

And what about the flying thing? Who of you haven't imagined what it must be like to fly? How cool would that be...such freedom!

Well, those are my current birdbrain thoughts. Send me your bird stories so I can share them with my readers. Until then, always be ready to stop for beauty and grace wherever you find it. Make a choice in your early morning regime to spot beauty that day. The more you do, the more you will find it...the more joy and good you will bring into being.

Don't miss out on the day's bounty...enjoy.

Think deeply about what's been said here. Read this a few times and write down ways you can get started.

Make some changes. Take some baby steps each day to notice beauty and feel joy.

### **Are There Birds on Your Yard?**

Do you know what kind of bird it is? Can you see a nest?

### **Inmates and Birds**

In His Majesty's Prison on the Isle of Wight in the United Kingdom, prisoners serving life terms are allowed to buy birds, such as parakeets, canaries and parrots to keep in their cells to keep them company.

### **Bird Man of Alcatraz, Richard Stroud**

**Robert Franklin Stroud** (January 28, 1890 – November 21, 1963), known as the "**Birdman of Alcatraz**", was an American federal prisoner and author who has been cited as one of the United States' most notorious criminals.<sup>[1][2][3]</sup> During his time at Leavenworth Penitentiary, he reared and sold birds and became a respected ornithologist, but because of regulations, he was not permitted to keep birds at Alcatraz, where he was incarcerated from 1942 to 1959. Stroud was never released from the Federal prison system.

Stroud began serving life in solitary confinement at Leavenworth, where in 1920, after discovering a nest with three injured sparrows in the prison yard, he began raising them, and within a few years had acquired a collection of some 300 canaries. He began extensive research into them after being granted equipment by a radical prison-reforming warden, publishing *Diseases of Canaries* in 1933, which was smuggled out of Leavenworth and sold en masse,<sup>[4]</sup> as well as a later edition (1943). He made important contributions to avian pathology, most notably a cure for the hemorrhagic septicemia family of diseases, gaining much respect and some level of sympathy among ornithologists and farmers.
