July 5: 8:00pm: 'Listening to: Mama sais by the Shirelles

Dear Bill,

Hi, how are you? I hope good. Nice to hear from you again. How are the dogs? I am having a great time when I get to spend time with the dogs in here. 5 black labs and 1 yellow lab so far. All being trained to help wounded veterans. I was in the hole for 30 days. No, it wasn't because of the visit requests with my mom. After 15 years, my new counselor, who truly hates me, recommended that my single cell be taken away. When this is done they interview you, so the psychologist interviews me and I told him, you cannot just put me in with anyone after this many years of being alone. I told him you'll wind up getting someone killed in here, it could be me or another person, I need to choose who it is because I need to feel safe. So he put in his report that I said I would hurt anyone they put in with me. I said those were not my words, he twisted them to his own words. So they locked me up. It was also the same day I found out my brother Bobby Sliney died. A long & boring story Bill. While I was in the hole, my half brother Jesse Baker died of drugs as well. I have been in the hole, plenty of times but this was my first time since 2011. I do have 2 other brothers, Justin John and Jeremy. But neither speak to me anymore. Jeremy, the oldest, he called my daughter some really rotten names and said she deserves to be raped for the way she talks and dresses. One, no woman deserves to be harmed in any way, Two, you don't say stuff like that about your own blood. I am the last of my fathers line. I meant sons. My biological father was killed by Phila. police in 1989. All of his sons are gone now but I have 2 sisters who live in Ohio. I do have a facebook site but my aunt Cindy pays attention to it. I don't have computer access in here. I just have my tablet with e-mails only for people who sign up on the connectnetwork.com site. I am the only child from my mom and bio.father, but my dad, Robert Brown, he has been in my life since I was like 4. So to e, he is my dad and he is dying of stomach cancer that spread throughout his body. My moms Leukemia is getting alot worse. I don't know if this is true or not but my great uncle, Dean Pezzeca, he did our family tree, he said anyone named Pezzeca is a relative. My family's original name was Pizzica, but it was changed when my family came here from Italy in the early 1900's, I had been trying to find my great uncle Tony's daughter, Antonia Pizzica, but so far I have been unsuccessful.

I am trying Bill. I am trying to improve my work conditions so I can earn more money to survive on. My typewriter is 18 years old and I really need a new one but for \$270, it'll be awhile before I can afford a major purchase like that. I am the Vice President of the Lifers organization in here, so that does keep me busy. We just held a candy sale and raised almost \$3,000 for charity, we chose 10 small charities and are sending them all \$300 each. Animal shelters, food banks, things like that, victims resource centers. Good places that could use a couple hundred bucks to help someone. The Pezzeca you found, what was his name? One of the ones I mentioned? There is a Philadelphia Police Officer named Michael Pezzeca, I'd like to know if I'm related to him or not. Well let me get going Bill, time for my shower & then bed. They worked me like a mule today. Take care and I'm glad you still read what I write. Hope you had a good July 4th. God Bless, ciao.
