

To Kim Jong Un why would you want sneak attack America with missile. That is evil. I don't understand why isn't another person who is in leadership that could stop this leader from ignorant decision. Which we know in life some people is not going to fight fairly because they are cowards. Anyone who tries to sneak attack anyone is coward. All this sanction mess has gotten out of hand with America, United Nation and Continent. This the part I don't understand about our President Trump it was ok for him and family to own businesses in the other countries when he wasn't president. You all was bestie. Now you president. You want to literally slap them in the face with these sanction. That is not right when you have got these people money and done business with them. I would be mad as well. It's like you was only befriending them for your benefits. Now you done with them, they are not important anymore. Kim Jong Un is going about it the wrong way. America, United Nation and Continent needs to work together because all our economy is in jeopardy. All this foolish fighting over all jobs going overseas is crazy. When Donald Trump had business overseas himself (over 20 business at that). So why can't we take a company overseas if want to. That is a little bit too much decision making in someone else life. I really want ~~the~~ these words to go away immigration and sanctions. It's called work together. Leave all the foolishness outside. In this game called Politics. It's seems like everyone wants to have their cake and eat it too. The best cake is the one shared. Remember that. It's know good when you eat it by yourself. Why cause normally you end up with a stomach

just as American has with the Quote and theory America first. Little by little America is ~~is~~ sinking along with United States and continents. The only problem I have with immigrants in jails and prison should automatically be shipped back to their countries since they are going to ~~ship~~ ship them back anyway. They don't have no parole OR probation once their back into their country. We got to empty the beds in jails and prisons to make room for the Americans who has to their time once upon release is going to be on probation or parole. Right now the State of Georgia jail and prison are over crowded. So I consider this a big issue that ~~now~~ needs to be resolved. Can anybody tell me why is important to have structure in life? Because things will be chaotic. That's why we have the Constitution, laws, human rights and direction in which way our government should be ruled. Our government is for the American People. It's for all humans to be treated fairly. Including the transgender. We may not agree in what they do in and how they do it. That's not for us to judge. God created each individual unique. No two people are the same we all different individual. That's what makes the ~~unique~~ ^{unique} world place to live in because you have different types of people in it. You might like ice cream. I might like sherbet at the end of the day we are to be treated equally. But the question for Donald Trump why does he feel compelled to ban Transgender from the military. What the American people should do is force an answer out of him. Is he judging or something happen in the military. That consist of large amount of transgender at fault of incident. ~~Even~~ ^{Even} then he cannot ban them. He would have to punish the one at fault. Which we have not heard no incident involving transgender. Basically Donald Trump left us with a foolish demand he wants done without reasoning. Which leaves plenty more question about him and his ability to lead our country continuously. So we as the American People need to know why you want to ~~ban~~ ^{ban} transgender from military? We have listening ears: the American People. The American people wants to know whether you are making sound ~~judg~~ ^{judg} decision. I was reading something to ~~do~~ today that tap in with this subject.
