OPTOMETRY, OTHER: Reporting an incident of sexual assault

REASON FOR REQUEST (list problem or medications needing refill) I would not give me his name. On 11-29-17 as a sexual assault. The co for which I call Thoti conducted an x-ray. The maintenance staff and lions was on the tier to the yard. Co Thoti was touching my arm. Lightly the inside left arm/forearm area. Upon return from the yard area (recreation yard room 3) he touch the inside of my right arm/forearm area in a soft sensual manner then just before I enter the cell he touch my right thumb nail slightly at the bed or base of the nail. I immediately see the redness and burn and slight cut and finger indent on my forearms. At Pilline (afternoon) I layed down on the floor and reported the injuries to nurse Arterio as quietly as I could while he was walking down the stairs on 11-30-17 during a pilline I talk to nurse C. Grimes and in the mist of talking to her I reported the injury to the right bed (outer area) nail. I explained to her what occur and why I was talking to her. At first I thought the co scratch or cut me with something. Then my memory kick in and I recall the touches. The injuries to the forearm was the width of his finger the next time he does this I'm going to try to call a Sgt as to see if he would take a picture of the injuries. It is not just him it is numerous of co-s. But they can injure a person with the touch of a finger. Severely.
