0620 - Dwelling upon Armondo 7 April 15 Wow, wow, wow! Affirmation from Joe - One sycophantic fibian prince to another. Armondo, having not read any LRT tech whatsoever is asked for appreciative accolades? Sycophant! One to another! Alas, your toothless "get along" domesticated cess pool of a world is all yours! My charged-up case championing a 3<sup>rd</sup> D Campaign in my Martian Puppet MB, good to pierce through the status quo of ignorance, is not conducive to a contented <sup>create-crede</sup> presence stuck on Antagonism.

"You sound better" comment on the phone... contact Escobar and ally-up via common enemy? i.e. help make Goehler stand down is plenty confirmation! We have differing Ideal Scenes - or at least differing methods and sacrifices necessary to achieve Ideal Scene of Sen Services within COCR/SOC.

Ideally "fixing" Goehler for COCR > making a Robot who deep and fits in, etc - Yea... I'm not the best candidate for your poster boy of reform. I do prefer single cell "predator" status - I enjoy work assignments when I get paid a measly stipend - yet not required to show-up. I've groomed a character which resembles unstable genius and serves to keep the ref. rat at bay. I'm really only approachable when something needs to be done - and even then it's a possible liability as I follow my own reason to DO, rather than submit to the reason of those do-nothings! "Need get you started on Basics Ext Civ." he says time and time again - as if after all my martial labors I should purchase one?!

Revenue factor in Sen. is the fundamental problem in Noah's Ark ideal. Work for free and pay for material to obey?! Sen needs more renegades it does!

Errant Knights who push the boundaries and expand the Ability to BE! I AM that errant Knight! True "Innovators" are "Renegades"!

Prep to hand over SPO grp to JeeB = Adjutant to Ben Cummin est. 1989? Wonder what part WG played via Tree?

041515 cont - Whereas my Strategy/Tactics are clearly and repeatedly expressed > rarely are they ack/duplicated nor counter postulate proposed — so I don't know what Ben Strategy is here! DVD's sent a Drugs/Psych/etc al are still not delivered / RRC not covered! Obviously I'm not the General in this war! And consequently not liable to Overt of Commission, ignoring the obvious frustrations. "You sound better" comment as the sound of Resignation to Fabian irresponsibility. Fact is — Fabian method does gather data from the expendable renegades, so Joe can't possibly lose, if he simply observes the randomness. Leaving ME spinning!  
THE TACTICAL PLANS MUST INTEGRATE INTO THE STRATEGIC PLAN AND ACCOMPLISH THE STRATEGIC PLAN AND MUST DO THIS WITH PRECISE DOABLE TARGETS.
