TS reports JR produced plans for LAC, do "just what we need", is promising. Max reports that CPM is processing Ben's application. Perhaps I should draw some sort of encouraging recognition to ack JR. as a noble gesture.

Looking through 2012 Scholarship book and see a glimpse of the inheritors of tomorrow. My vision at the cross road with the Montana Freeman is often recalled when I see the Ambition rule of nature (Pro. 29:18). My people perish! I feel an unction to bolster my youngins with...? How can I help them see what I see without averse consequence? Rather, develop clear comm pointing out opportunities which they can develop affinity with and pursue on their own Ambition. This is the way to appeal to their Consumer type socialist training. Help them consume the curiosity of Dad's intelligence, and therein spark their self-determination, whatever that BE.

Therefore, given the choice of R copy/relay to Yash
