My thanks for your coments & insight to the relevance of the abolition of sencless death. I am against abortion to! All life is precious.

I reflect upon a quote by freud:

"every individual is virtually an enemy of civilization, thus civization has to be defended against the individual...For the masses are lazy & uninteligent... and the individual composing them support one another in giving free rein to their indiscipline."

As for the death penalty it creates a whole new set of victims once the state murders the prisoner. victimizing the family who did nothing to deserve said torchure for all the years the prisoner waited.... hoped prayed with them. to be sent spiraling into the whole gauntlet of emotions again.

From a death row prisoner "it is a living nightmare."

I invite you all to watch my upcoming interview documentrary on netflix new show: death row diaries. Air's this spring 2018.

In the interview i asked the victims family to forgive me, it went good and forgiveness was given. The Olive branch was extended & grasped. healing can now begin on both sides....

As for my fate- it remains in the hands of the appellate courts.

I thank you all for your support in these tribulating times we live in, praying for change - for advancement as a society. Life matters indeed. People do change, all are worthy of redemption.

Peace Love & light, *chvck*
