

The Opioid Crisis

We have to realize something history repeats it self. There is nothing new under the sun that hasn't been done already. Just sometimes it's done through a different aspect, which lead me to the 80's and 90's Aids and crack epidemic. People was dying and addicted tremendously. People did their fundraiser etc. But I don't remember our government releasing out millions to help the epidemic. Yes their we're scientific research but still their was not alot money release out of the government. So what am I getting at; why so much money for the Opioid Crisis? When this didn't happen for the crack and ~~epidemic~~ Aids epidemic. Currently we are in Aids epidemic right now. Is it because of majority of the Opioid victims that is dying is whites. What if majority of them was African American would those millions of dollars would have been use out for their opioid crisis? It surely wasn't when the African American was suffering the ~~crack~~ crack epidemic in the 80's and 90's. I know you saying have you had a child to die on opioid overdose? Absolutely not, but how many parents child died from a crack overdose in 80's and 90's they had to deal with it because the government didn't care nobody chader leader on their child behalf. The whites stood by the sidelines. We got to pass laws that will tighten up on crack sells and get these criminal off street for good. Now the shoes has flipped on the whites. Nobody is saying we got to pass laws that will tighten upon opioid sells and get these criminal off the streets for good. In a certain ~~article~~ ^{article} passing laws on the sells of opioid. You can call this a race ~~or~~ ^{article} or whatever you want. ~~to~~ because it's the core of the truth. All of certain the whites want to follow my poor child or family member. Want everybody to feel sorrow for your loved one who chose to take their own life. I been that addict pain killer and tried to overdose. But if I died who would have been at fault myself. Not the government or my family. I surely wouldn't want the government or my family to have a pity party. Because it would have been all me because I didn't chose to deal what was wrong

with me. American, United Kingdom and Continent who has a Opioid
problems needs to deal with their own psychological and social
problems. you have to deal with what is wrong with you. This
unnecessary spending to deal with Opioid crisis is not logical.
now if you say I am making sure there are more psychiatric
doctors in their area to help. How many can attest to this sometimes
they can't help you. It only makes your condition worse. I've been
there. After I seen my psychiatric doctor or therapist the voices
in my head only got worse. you will never come out this, nobody loves
you and you might as well end it all besides nobody loves you or
care about what you going through. I am no longer no addict to
Opioid but what keeps me from going back is self talk ~~is~~ positive.
Way. you don't have to take that find help. you are better than that.
you are somebody special it doesn't matter what the negative people
say about you. ~~That~~ Girl you are sexy, you are loved by many and
girl hold your head up you're coming out of this. So people we
don't have a Opioid crisis, we have a crisis of people who don't
want to be free of their addiction, we got to stop having pity
parties for them. Ok.
