

Corporate Punishment

I believe Corporate Punishment has become the entity of life. Not just in the business world but independently in individual's person life. Everyday you have to stand on guard that you are not punished for something you didn't do. Whether it's on your job, schools, corporations, personal life, church, or leisure time or just at a average organization, or a institution, or government or justice system. Basically we have to live a life of suspicion of people. I can remember when I was molested by my stepdad from 9 to 13 years old. My mom was a nurse. She worked 12 hour night shift. When I told her she didn't believe me. My mom had no knowledge that this was going on. But into today society she would have been in prison for molestation, just because she didn't protect me. But how could she protect me if she had no knowledge of what was happening until I told her but she didn't believe me because my stepdad was a pastor of a church. Just say she and my stepdad went to prison. What would she have learned if she had no knowledge concerning the molestation. Nothing because she had no ideal. So there was no lesson to learn except you have to be careful who trust over your children. Just say your lady stay in prison 20 years. They found out she had no knowledge what happened. Today society the District attorney, GBI and detective feel they had every right to put her away. They not going to apologize because they know they made right decision. I feel everyone of them should do sometime in prison to see how it feel. I had a friend who worked at the doctor office. She had no clue they was stealing the medical funds. Well they arrested everyone that worked in that doctor office including her. They sent her to prison because they felt she was part of the sting. So she set for 5 years for a crime. She had no knowledge about. So what lesson she learned besides torment and humiliation.

This girl left behind husband and children. A group of people arrested for one dead body and robbery went bad. Three of the people got out of the car before anything ever jumped off. Later on the fear about the situation but one was at the baby mother's house, the other one was sleeping in bed and the other one was at ma's house chilling on the phone with his girlfriend. But the police arrested everyone because they was ~~the~~ together ~~early~~ earlier. Not because they commit a crime for sure. Even though there is one dead because a robbery went bad. They arrested everyone including the three innocent people who had knowledge about what happened so they all went to court because they fear that they was going to spend the rest of their lives behind bars they plea bargain out under coercion. They went to prison was tormented by the guards and inmates. One of them was even raped and beaten. Corporate Punishment is dangerous needs to be stopped. It's average day at the prison. Well two inmates got into a argument over the TV. The punishment nobody gets to watch the TV. How is it that the other inmates at fault when the two individual was clearly at fault. Do you think the innocent inmates learned a lesson absolutely not. Did the one at fault learned a lesson no because now that they ~~no~~ know they going to get everyone in trouble. They are going to keep doing things to get everyone in trouble because they have been giving the power to do so. This what our society is teaching repeated offenders as well. Sometimes when they are arrested they have groups of people with them. So they camouflaged that it really was their ideal so they begin to point to others. ~~How~~ They do the same thing in the jails and prison. Nobody shouldn't have to live their lives in suspicion. But we do

Because Corporate Punishment has become a big bully in our everyday life. It's time to put a complete Stop to Corporate Punishment bullying.
