Lone, Califelony 95640

TPOW

GRADE

Q1- What role do you see that work plays in peoples lives?

A1- Purpose. Something to DO, BE, HAVE.

Q2- How important is work in your life? Explain.

A2- My personal conditions of existence doesnt rely upon any other-determined purpose, fortunately. My "purpose" in life is rather to stimulate Thought (B) into action. It's what I DO, who I BE, and where I HAVE the most fun... in the economy of LIFE.

w/c LIFE, 1. (understanding, when we say "life" we mean understanding, and when we say "understanding" we mean affinity, reality and communication. To understand all would be to live at the highest level of potential action and ability. Because life is understanding, it attempts to understand. When it faces the incomprehensible it feels balked and baffled. 5. that which is posing and solving problems. 6. life is a game consisting of freedoms, barriers and purposes.

w/c LIVINGNESS, is going along a certain course impelled by a purpose and with some place to arrive. v It consists mostly of removing the barriers in the channel, holding the edges firm, ignoring the distractions and reinforcing/re-impelling one's progress along the channel.

Q3- What is insecurity?

A3- At 1.1 on the Hubbard Chart of Human Evaluation, under the REALITY (AGREEMENT) column, it would appear that insecurity exists in the absence of knowledge agreed upon as reality.

Q4- Describe a time when your knowledge of an area resulted in increased security.

A4- It has been incomprehensible to me how Scientology - a system of organized axioms resolving problems of the spirit, life and thought - plays so little a role in rehabilitating wayward thetans exiled to penal colonies. We are the problem solvers; after all! Having identified this problem consequently permitted me the responsibility to remedy it by creating a Scientology Study Group here in prison. Livingness though, dictates the quest for security is a quest for constancy, which in the case of securing the survival of Sen. Study Groups inside prisons, would require Sen. Volunteer Ministers to actually facilitate classes in order to prevent out-ethics and maintain KSW policy. Herein is where insecurity threatened other-determinism; in that Criminals - aka: PTS/SP etc., are considered verboten, per policy. Yet the "Policy" of ITSE pg 218 b. regards PROCESSING.

A4- cont.

I'm in total agreement with that policy which forbids auditing sessions for active criminals. Considering ITSE pg 205 PTSness and Disconnection though, Wayward thetans exiled to penal colonies - disconnected by society, may yet be receptive to rehabilitation if given the opportunity. I am secure in knowing that punishment has minimal workability (ITSE pg. 60), and "The caught criminal wants to be rendered less harmful to society and wants rehabilitation", per pg. 45 ITSE. I am secure in knowing Service and Handling are the same thing. And that the watchword is SERVICE (HCOPL 29 Oct 1959), and: "any service is better than no service". I am secure in knowing that suppressive reasonableness is a common trait (ITSE pg 257); It comes from the inability to confront evil. Evil takes a bit of confronting, Ron said: People who want desperately to "have no trouble" often won't confront and handle trouble. I am secure in knowing that Scientologists are trouble shooters, and that provided with more Attention on the matter of rehabilitating criminals, there will be VM's who will happily commit to a salvage campaign and help reverse the prevailing Dwindling Spiral so paramount in prisons. I am secure in knowing Sen. tech resolves problems. I am secure in KNOWINGNESS, for the love of truth.

Q5- What do you think holding and improving a job depends on?

A5- To obtain, hold and improve a job, one would have to know the exact, precision rules. One's aptitude is the key in concert with intention, determines the Potential Value of an individual within their particular zone of influence.

Q6- What goals are you trying to attain in your own work?

A6- A civilization without insanity, without criminals and without war - where the able can prosper and honest beings can have rights, and where Man is free to rise to greater heights. My personal goal, my "purpose" in life, is merely to stimulate Thought into action, in order to present opportunities to become more aware of SELF-DETERMINISM.

Q7- Describe some of the things Scientology can change in a person for the better.

A7- Scientology is a science of life. It helps individuals resume self-control. Scientology increases intelligence. It brings order into chaos.

Q8- List some things you would like to improve to help you do better in life.

A8- Improving ARC with Scientology terminals would permit mutual KRC toward SPD success, I think.

A8 - cont.

Otherwise my own self discipline determines what I dare BE, DO, Have in PT. Whether that is to apply attention to this course - and others, or apply more attention to artwork projects, or stroll around the prison yard radiating confidence and freedom, my own self-determinism is a witness to the impact Scientology has had in my life. I'm so grateful to LRM for humbly tendering as a gift to man THE FACTORS, which spelled out the game of life so perfectly. The Man and The Golden Ball provided everything necessary to undo the black enchantment in the wog world, and at last said anybody could use this ball that wanted it. I'm left to wonder what Ron would say about my ambition to achieve a Scientology Prison Outreach, where VM^s maintain space inside penal colonies toward rehabilitation? He smiles knowingly, I'm certain.

TPOW

GRADE

Q9- What is the definition of a confusion?

A9- A CONFUSION IN THIS UNIVERSE IS RANDOM MOTION.

A confusion can be defined as "any set of factors or circumstances which do not seem to have any immediate solution."

W/C CONFUSION, 2. plus randomness. Motion unexpected above the tolerance level of the person viewing it. 4. a confusion consists of two things, time and space; change of particles in, predicted or unpredicted, and if they are unpredicted changes in space, you will have a confusion.

Q10 Describe a confusion you have observed at work or at home.

A10- Recently I've had a problem with a discourteous neighbor who has been invading my space with his rap music at 0600 each morning.

Q11- What is the DOCTRINE OF THE STABLE DATUM?

A11- Until one selects one datum, one factor, one particular in a confusion of particles, the confusion continues. The one thing selected and used becomes the stable datum for the remainder. A stable datum does not have to be the correct one. It is simply the one that keeps things from being in a confusion and on which others are aligned.

All cont.
note Sen. Axiom 53: A Stable Datum is necessary to the alignment of data.

Q12- Give a real-life example of a confusion that was steadied or mastered by a stable datum.

A12 In re Discourteous Neighbor's rap music at 0600:
As stated in TPOW: "A confusion is only a confusion so long as no factor is clearly defined or understood."
Apparently the neighbors stable datum^(s) and mine differ - hence, the problem. His includes a dozen or so of his prison gang buddies adding force to his stupidity, whereas my force of intelligence is assisted by LRM.
I have a responsibility in my zone of influence to bring order to chaos (Sen. Axiom 56), per Factor #1, etc.
Life (understanding) is a game wherein Theta as the Static solves the problems of Theta as MEST (Sen. Axiom 48). It's a simple matter of controlling the stupidity disturbing my peace. Simply pounding on the wall dividing our cells made them aware of my counter effort to maintain peace - the first few times. Maintaining that control then required me to establish a greater interest in the problem I'm having with them invading my space-time, by a more direct approach to communicate my problem - becoming their problem. This too seemed to work for awhile, yet

A12 cont.

eventually their youthful inconsideration requires reminders to maintain the peace — so I wrote out scenarios of comparable magnitude they could relate to having a certain responsibility for handling, and I gave it to them on the reverse side of one of my trophy newspaper articles about stabbing my attorney, as a final effort of overwhelming them with a stable datum they can admire — attached to scenarios of comparable magnitude they can understand. Problem solved.

note. Sen. Axiom 54: A tolerance of confusion and an agreed-upon Stable Datum on which to align the data in a confusion are at once necessary for a sane reaction... This defines sanity.

w/c SANITY, 1. the ability to recognize differences, similarities and identities. 7. Sanity is the measure of how ably an individual assists things which assist survival, and inhibits things which inhibit survival.

Q13 Describe "good control".

A13 Good control is certain, positive, predictable.

Q14 Describe someone you've seen who handled something with good control. What was their level of certainty while doing so.

A14 Prison guards maintain control with a certain overwhelming force of violence. For instance, a guard disturbed by

A14- cont.

a prisoners loud music will give him the choice of turning it down- or losing it. And in this universe of bestial thugs, guards certainly overwhelm prison gang stupidities which would have it their way by intimidation.

Q15- What is meant by a stable datum being "shaken"?

A15- Demonstrating the falsity of the stable datum produces corresponding confusion. To make anyone confused, all you have to do is locate their stable data and invalidate them. By criticism or proof, it is only necessary to shake these few stable data to get all a persons confusions back into action.

Q16- Give a real-life example of someone becoming confused at the invalidation or loss of a stable datum.

A16- Discourteous neighbors miscalculated their overwhelming game typically unchallenged by a domination serfac. In order to remedy this potentially volatile confusion of war tactics, I've replaced the bad control with a certain good control by creating a sort-of alliance. By borrowing their music CD's I might listen to at my discretion, our stable datum only regards courtesy issues maintaining the peace. A confusion is only a confusion so long as no factor is clearly defined and understood.

6-2-18
Lesson #3

William Goehler #KT1832
POW 409020, A2-233
Lone. Califelony 95640

TPOW

GRADE

Q17 What is the definition of work?

A17 Activity with purpose. Work is "the application of attention and action to people or objects located in space". (p. 104)

w/c WORK, 1. work, in essence, is simply the handling of effort, the use of effort.

Q18 Describe a person or group who had plenty of work. What was their attitude toward their work?

A18 Slaves come to mind. Their Conditions of Existence had purpose - within the dimension of other-determinism. The prevailing "attitude" toward slavery is in the Apathy of NO RESPONSIBILITY.

w/c NO RESPONSIBILITY, 1. unwillingness to make a decision or unwillingness to make a condition of being... 2. the inability to handle force.

w/c APATHY, 2. a very docile and obedient state of not-beingness.

w/c NOT BEINGNESS, is an acceptance of control by the environment and abdication even of control of self.

w/c SLAVERY, being positioned in another's time and space.

w/c CONDITIONS OF EXISTENCE are BE, DO and HAVE

w/c PURPOSE, the survival route chosen by an individual.

Q19 Define play.

A19 Play should be called "work without purpose". It could also be called "activity without purpose".

Q20 Describe some activities that classify as play.

A20 Going to the theater to watch a show. Ice skating on a frozen lake. Surfing ocean waves. Roughhousing with youngsters.

Q21 What is the stable datum of work?

A21 Purpose.

Q22 Describe someone you have seen do a job with a clear purpose.

A22 Prison Guards are wage slaves who occupy the space of control — they as individuals wouldn't be able to handle alone. Their 'clear purpose' is to witness and prosecute to the full extent of the law when required to do so — otherwise their job is to impose and follow the rules, and unknowingly spread their disease of Degradation.

w/c DEGRADATION 1. the lower harmonic of apathy. 3. being big and getting small and not at your own request.

Q23 What does it mean to "create" one's job?

A23 Men who detest one job or another detest it because they can't see where it is going or can't believe they are doing any important thing. To "create" one's job simply means assuming responsibility for the purpose intended.

Note Sen. Axiom #53: A Stable Datum is necessary to the alignment of data.

Note Sen. Axiom #54: A tolerance of confusion and an agreed-upon Stable Datum on which to align the data in a confusion are at once necessary for a sane reaction on the eight dynamics. This defines sanity.

Note Factor #3: The first action of beingness is to assume a viewpoint.

w/c CREATE, make, manufacture, construct, postulate, bring into beingness.

w/c BEINGNESS, 1. the result of having assumed an identity. 2. in terms of human experience, beingness is space. Space is a viewpoint of dimension. The points which mark an area of space are called anchor points, and these, with the viewpoint, alone are responsible for space. The "creation" of space is the "creation" of anchor points, which is in itself, the "creation" of beingness.

Q24 Give a real-life example of someone who actively, daily created their job.

A24 The use/handling of effort is a matter of control, when necessary. Otherwise life is for living. For instance; I remind myself daily that Mindfulness is my only job. My awareness of Awareness, is the only worthwhile purpose

A 24 cont.

in the theta universe. Whenever I do my artwork products, or contribute my fair share at my prison job assignment, I'm always actively maintaining Awareness of the Here & Now.

Note Dn. Axiom #28: The mind is concerned wholly with the estimation of effort.

Definition: Mind is the theta command post of any organism.

Note Dn. Axiom #47: Effort can be accomplished by lambda only through the coordination of its parts toward goals.

w/c GOAL, 1. the prime postulate. It is the prime intention.

w/c LIFE, is theta plus mest. Life is a game consisting of freedom (understanding), barriers and purposes. cf. Dn. Axioms #1 through #8.

w/c LIVINGNESS, is going along a certain course impelled by a purpose and with some place to arrive. It consists mostly of removing the barriers in the channel, holding the edges firm, ignoring the distractions and reinforcing and reimpelling one's progress along the channel. That's life.

w/c AWARENESS, 1. the ability to perceive the existence of.

Awareness of Awareness 2. the individual 3. the thetan is the awareness of awareness unit.

w/c THETA UNIVERSE, 1. thought matter (ideas), thought energy, thought space, and thought time, combined in an independent universe analogous to the material universe.

w/c MINDFULNESS: 1: bearing in mind: AWARE

Note LOGIC #22: The human mind is an observer, postulator, creator and storage place of knowledge.

w/c CONTROL, 3. positive postulating, which is intention, and the execution thereof.

6-3-18
Lesson #4

William Goehler #K77832
POW 409020, A2-233
Lone, California 95640

TPOW

GRADE

Q25 Is there such a thing as "bad control"?

A25 Never! Control is either well done or not done. If a person is controlling something, they are controlling it. If they are controlling it poorly, they are not controlling it.

Note: Dn Axiom #60: the usefulness of an organism is determined by its ability to control the environment or to support organisms which control the environment.

Q26 Give examples of a person who wasn't controlling a machine and a person who was controlling a machine.

A26 An example of a worker controlling a machine would entail knowledge about the machine's purpose and function - and a corresponding ability to operate that machine. My fan, for instance, circulates air - and controlling this machine requires me to keep it clean and unobstructed.

Vis-a-vis, a worker whose not controlling a machine doesn't understand the machine's purpose and function and therefore is unable to operate that machine adroitly. In the instance of fan maintenance, the person who wasn't controlling that machine will soon enough not have a machine to control.

Q27 What is the ANATOMY OF CONTROL?

A27 Control may be subdivided into three separate parts:

A21 cont.

START-CHANGE-and-STOP. Start-change-and-stop also comprise a CYCLE-OF-ACTION.

w/c CONTROL, i. you are stating a greater truth when you say that control is predictable change than if you say control is start, change and stop because start and stop are, of course, necessary to change. You might say the thinking or philosophical definition would be PREDICTABLE CHANGE.

w/c CYCLE OF ACTION, i. the sequence that an action goes through, wherein the action is started, is continued for as long as is required and then is completed as planned.

Note Sen. Axiom # 55: The Cycle-Of-Action is a consideration. Create, Survive, Destroy, the Cycle-of-Action, accepted by the GE, is only a consideration which can be changed by the thetan making a new consideration or different action cycles.

Note Sen Axiom # 56: Theta brings order to chaos - and vice versa.

Q28: Describe someone you've seen at work who performed a cycle-of-action related to their job.

A28 Landscaping has the responsibility of maintaining lawns, requiring cycles of watering and then mowing to maintain growth/decay, in the Actual Cycle-of-Action. I can see their adept control of watering/mowing tools effecting our environment for the greater good.

Q29 What is the cycle-of-action of LIFE?

A29 CREATION - SURVIVAL and DESTRUCTION

The essence of survival is change. Creation is, of course, starting. Destruction is, of course, stopping.

Note: Dn. Axiom #56: The cycle of an organism, a group of organisms or a species is inception, growth, re-creation, decay and death.

Note: Dn. Axiom #57: The effort of an organism is directed toward the control of the environment for all the dynamics.

w/c CREATE, make, manufacture, construct, postulate, bring into beingness.

w/c CREATE-CREATE-CREATE, create again continuously, one moment after the next = SURVIVAL

w/c SURVIVAL, z. survival might be defined as an impulse to persist through time, in space, as matter and energy.

w/c DESTRUCTION, in terms of action, is a creation of something against a creation of something else. There is another type of destruction and this is no more creation. If one stops making something completely and ceases to be a party to its manufacture, it no longer exists for one.

[alas, the Handle or Disconnect Imperative]

Q30 Give an actual example of a cycle-of-action of LIFE, showing all its parts.

A30 This appears to offer me an opportunity to AS-IS a present time problem.

A3D - cont.

w/c PROBLEM, 1. is postulate-counter-postulate, terminal-counter-terminal, force-counter-force. It's one thing verses another thing. You've got two forces or two ideas which are interlocked of comparable magnitude and the thing stops right there. All right, now with these two things one stuck against the other you get a sort of timelessness, it floats in time.
5. a problem is the conflict arising from two opposing intentions. A present time problem (PTP) is one that exists in present time, in a real universe. 6. something which is persisting, the as-is-ness of which cannot be attained easily.

w/c ARC BREAK, 1. a sudden drop or cutting of one's affinity, reality, or communication with someone or something. Upsets with people or things come about because of a lessening or sundering of affinity, reality, or communication or understanding. It's called an ARC break instead of an upset, because if one discovers which of the three points of understanding have been cut, one can bring about a rapid recovery in the person's state of mind. 2. an incomplete cycle of some kind or another. It's a lowering of ARC, so we call it an ARC break. Its incept and so forth is an incomplete cycle of action.

w/c INTEREST, 1. more consideration than attention and is therefore attention with intention to give or attract attention. Interest is only absorbed attention and the desire to talk about it.

Mort. - Let's begin session Nemo. Do you have a PTP?

Nemo - Not really, Mort. Not any more - it simply is what it is.

Mort. - (suspecting Apathy or Boredom with "it"). What "it" is that, Nemo?

Nemo - This SPD game occupying all my attention these past 4 yrs +. I thought there'd be more interest in "it" by now.

Mort. - Please elaborate. What exactly was the postulate and/or the counter postulate involved with this problem regarding interest. Describe your interest in 'the SPD game'.

Nemo - The prime postulate? By late 2010, after my step son paralled from here, my thespian games - projecting satyriasis - had served its repulsive purpose. And that persona - lid determined circa 2007 at CST, marking my first decade of exiled misery - had produced an apparent glee of insanity, liberating ME from the responsibility to help anyone anywhere anytime in the peral universe where prevailing interest all too often happens to be predacious and/or parasitic.

(Dramatizing Valence(s) - Valence Case? Dramatizing Psychotic?)

* START (CREATI

A30 cont.

Nemo-cont: (Help Processing, Interest in help)

Making myself exempt from helping those vulgarians, I'd determined to rather help the helpers from time to time with whatever I could. By 2013, I'd determined to snap myself out of this degraded glee, and produce my Swan Song SPO effort to expand the LRH legacy.

(CREATION) SURVIVAL "CHANGE" COUNTER-CREATION, Destruction/CRSA "STOP" "CHAY"

Mat.

Thank you. That is an interesting preamble. Now (TR-3); please describe your interest in 'the SPO game'.

Nemo

NON-EXISTENCE FORMULA

I had sent letters of interest to BRIDGE PUB. a number of times over the years, until finally I'd rec'd an ack. back from R, circa 2013 - who proceeded to produce a flood of material with a regular comm. flow to prove me mettle and revive my Beingness - I thought. It seemed to me that it was an initial attempt to overwhelm me, but that only served to affirm my invocation manifested a (problematic) worthy ally, I needed so desperately to admire, who also represented the Sci. technology which so drastically influenced my life.

(START/CREATI

X-mas day 2013, R appeared at my first visit in 17 yrs of exile. At that particular time I was truly at my wits end with a PTP which required a TR-10 demo - and I was hewn-over to the practicality of adept application of such a simple process.

CHANGE/CREATI

LIABILITY FORM

Afterward I'd confessed that it appeared an impossible task for me to rekindle a spark of intelligence within my zone of influence. Attempting to do the impossible for compliant numbskulls was killing me, I'd said. This confession naturally initiated a Deadly Quartet session where I was able to recall the actual Help I provided in time past - in order to restore my confidence and interest in both that Help IS possible - and I AM able to provide it - despite apparent shortcomings.

(re CREATION SURVIVE

Wow! Where I had went out to this visit trapped in my overwhelming domination games, on the verge of homicide - I'd been transformed with a certainty that **Something CAN Be Done About It.**

Once again, I determined TO BE CAUSE. And stabilizing my own case was paramount. So while I surfed the waves of material R flooded me with, I was determined to complete Crimmon's curriculum - after a number of blows over the years. This had required me to assume responsibility and produce a KR (effort to invoke HCOPL in re providing the entire crs material) in order to allay the frustrating comm lag effect.

(re CREATION) "SURVIVE" CHANGE

NON-EXISTENCE -TO- DANGER FORM

I think maybe this is when R knew I was the best candidate to champion something big. Unfortunately, having identified himself as S-O. I had mistakenly assumed that he was 1/2 of this game in the making - where I intended to introduce Scientology to help re-habilitate prisoners. I certainly had PROBLEMS OF WORK to consider with this postulate.

(re CREATION) "SURVIVE"

6-24-18

A30 cont.

Essentially: First there is chaos (random motion), then from the chaos something emerges (creation), it grows/persists (survival = change), it decays and dies (destruction = counter creation) and chaos ensues (random motion = confusion).

* Create-survive-destroy imply the INTENTION of life (ARC) to ward objects.

* Control consists entirely of starting, changing and stopping.

Thus the secret of doing a good job is the secret of control itself.

Workers are most often victimized by bosses, juniors or marital partners who are not capable of controlling anything and who in some peculiar way are obsessed on the idea of control. A worker who is thusly connected with something that he himself cannot control, and which is incapable of actually or really controlling him, performs his work in a confused state which can only lead to ^{ARC break} (sad effect) difficulties and distaste for (SPO) work itself. cf. A29 w/c SURVIVAL - DESTRUCTION.

cf. A2 w/c LIFE. cf. A9 w/c CONFUSION. cf. A12 NOTE, w/c.

w/c POSTULATE 1. a self-created truth would be simply the consideration generated by self. 3. that self-determined thought which starts, stops or changes past, present or future efforts. CAUSATIVE THINKINGNESS.

Note Sen. Axiom #55. - cf. A27 Note.

Q31- What defines a good executive and good subordinates?

A31- Defining "good" as their ability to start, change, and stop things - it is apparent that from the topmost member of the board down to the lowest worker, each and every one of them is involved with starting, changing and stopping people, materials, machinery, products and pieces of the environment. The optimum condition would be for everyone - from manager down to janitor - TO BE capable of starting, changing and stopping - and to be able to endure being started, changed and stopped. Thus we would have a balanced and relatively unconfused activity, i.e. COOPERATION.

Note HCOPL 27 OCT 69 ... A good executive arranges personnel and organization to handle types of actions and confusions. He does not broadly comm into disorganized areas except to organize them. Chaos is the basic-situation in this universe. To handle it you put in order. Order goes in by being and making stable terminals arranged to handle types of action and confusion. You solve areas by reinforcing stable terminals. Executives who do not grasp this live their lives of total harassment and confusion.

Note HCOPL 4 OCT 68 ... Ethics presence is an X quality made up partly of symbology, partly of force, some "how we're supposed to's" and endurance. Without in any way softening your approach, you should know that real force is dependent upon ARC, and the major threat is the interruption thereof.

Note HCOPL 4 APR 72; ETHICS

A31 cont.

Note HCOPL 23 July 72 RB - THE VITAL NECESSITY OF HATTING in The whole is only the sum of its parts. If all the parts are each one at cause, then the whole will be at CAUSE over its environment.

Q32- What results have you seen of executives or employees of a company who were able to start-change-and-stop things?

A32- Cooperation and "alignment of activity". If (WHEN) everybody is agreed on the worthwhileness of any activity and if (WHEN) everybody in that activity were capable of actually controlling those items or persons which were in their immediate sphere of action, it would be found that planning would not have to engage in much supervision in order to effect the execution of the ideas involved.
