

Concerns OF Retaliation

Page 1 OF 2

If you're following my blog post then you've read my June 26, 2018 letter to MR. John Palmer, Assistant Regional Director. We don't fear retaliation from him, but from this Administration, and its my friends and family who are gravely concerned, because they've been through it with me. Sgt. Stokes who was a visiting park sgt here in 2014, even admitted to my mother that the Disciplinary Report he wrote in April 2012 did not seem right. It was a straight set up, and he admitted it in so many words. Yes I've suffered a lot of abuse at the hands of Criminal Correctional Officers, who have violated state and Federal laws in order to reprimand against me. All over what I write. They've falsified state documents, lied, put me in unconstitutional strip cells, torturing me in cold cells, assaulting me twice while I was in full restraints handcuffs, shackles ect. The 2nd assault they said "BLOG ABOUT THIS!" and then beat me down until the Lt. said that's enough. Most of that was in 2011-12.

But in 2015 they left us on the recreation yard in extremely cold temperatures when it began to rain and the wind picked up. Staff told inmates "you can blame this on Clark." We're going to make sure he gets his rec." They were trying to instigate an inmate or inmates to jump on me. Didn't work.

Last July 2017, they came in my cell, they did a cell search, but the only thing they took was paper, ink pens, envelopes and writing materials. Which they had to return a week later. On that, they made a mistake and left a paper trail which they usually don't do.

This is a system rooted in corruption, and those roots run very deep. Yes my family and friends concerns are very legitimate. But as you can see by the contents of the letter, change is needed. These are some of the most miserable

conditions that you could ever imagine!" Even the officers, who are only temporarily back here are miserable. They are covered in sweat, uniforms soaked! When people are hot, they get extremely agitated, and when in that state of mind, its easy to act out in an irrational manner. When I get agitated, I start writing, others dont have that same outlet. And staff when in that state of mind, become very unpredictable and dangerous. yes, the concerns of retaliation, are rooted in reality of what has taken place. so I very well may need your prayers and assistance if acts of reprisal are taken. Thank you, and may God bless you.

In Peace and Love

Ronald W. Clark
