

## Help a Sick Vet Please

Hi,

Is there a lawyer out there willing to help a veteran? A veteran has become paralyzed on his entire right side. I have watched him stumble around everyday for a month as his condition worsens. It is not a stroke, but what is it? Tumor, cancer, spinal degradation...

\*

My wife had a brain tumor and her symptoms were similar.

\*

Our health care unit is giving him aspirin and telling him nothing is wrong. This is common treatment by the prison doctors.

\*

We are denied access to V.A. healthcare. We need an MRI, which never happens. All the proper internal steps have been exhausted. This is something I personally have been fighting for many years. Is there a lawyer, or University Law School, willing to correspond with me and take on this health care issue?

You may very well save a vets life. My mail address is on the front profile page.

Thank you, David
