

Way to go Mr. President (Fri 7-27-18)

Okay, let's give credit where due folks...

American GDP growth over 3%!

Way to go Trump!

That's something to brag about.

I didn't think it was necessary to dog on Obama and Bush of course. Many of these successes are based on the building blocks of previous administration's.

If I remember. - during the 2016 election our deficit was at 17 trillion! Okay it's lower by 50 billion today and we accelerated our balancing by 10 years. Great news! We're going in the right direction!

Now - I wish all the stupid drama between Republicans and Democrats would stop! Check and Balance of our system works, so work together for the "common good" of America not the selfish political agenda.

*

Why did I share this? Yes, I am in prison, but I am still a citizen of this great country that I love. Everyday I think about what I can do to help this nation become more of the ideal that our US Flag represents. To live up to the goals outlined in our Declaration of Independence and our Constitution.

*

Keep your friends and family who are in prison a "part" of our society. Some families provide subscriptions to local and national newspapers and magazines.
