

I remember

I remember in the 80's when there was a commercial that told us why we should not smoke marijuana. In this commercial they would break an egg on the hot pavement it would begin to fry. They said this what marijuana does to you fry your brain. I could reflect back thinking I surely don't want my brain fried. But in the back of my mind I was curious does it really do all that? Guess what 21 years old came. Who I had to answer to myself. I was so legal for a lot of things. I used out. I tried Alcohol, marijuana, ~~liquor~~ wine, fruit mix drinks, Diquaries, champagne. I got nothing out of ~~not~~ none of them. Marijuana made me ~~so~~ mad because I was eating out of my refrigerator like I had been without food for days. I had a complex about my weight. Now ~~the taste~~ for the taste I like different flavors wine, Diquaries and champagne. I don't like the drunkenness and vomiting. I will drink wine, Diquarie and champagne but not too much. I am social drinker. Every once in a while. But what trips me out in this era. How marijuana is legal

How people are willing out on marijuana
and it's products. Times has change that
for sure.
