

IS HOW YOU MAKE IT...

MIXING MAINLINE AND SNY CAUSING MAJOR DEADLY PROBLEMS.

California Department of Corrections (CDC) is creating a very major problems in every prison in the state. On level 1 and 2 yards they are making the yards 50/50 which means they are forcing "mainline" (IE: gang sters, and non programing inmates) to co-exist with "SNY" (sensitive needs yard, IE: programmers and men seeking rehabilitaion and change). Right now this is causing major problems on these yards that are already 50/50. There are riots, fights, murders and many inmates are being sent to the hospitals. Also the guards are being hurt too. I think they are doing this on purpose in order to secure jobs for the guards and keep inmates in prison longer. With the increase in violence the guards can ask for more money and offer more positions. The CDC union is the most powerful in the state. I think one of the main reasons why they are doing this so inmates will have to stay in prison longer because they get more time for fighting and killing each other and they become lifers with a 3rd strike.

California Department of Corrections (CDC) wants to keep as many prisoners as they can. They dont care about Restorative Justice Rehabilitaion. They have been in favor of housing us like animals and letting us die here. This 50/50 idea should be stopped right now. The SNY yard was started to stop violent attcks on inmates by other inmates. It also gave a place for inmates who do not wish to participate in the violent prison gangs started supported by guards who have a history of extorting and manipulating inmates to do their bidding. Now they are trying to stop the progress of the SNY yards by saturating them with the violent gang members from the "mainline". They cannot name one good common sense reason for making these yards other than to serve their own purpose.

To all family members of inmates. Please contact your congress man, ACLU, and CDC as well and tell them to stop this destructive decision. There are also many advocates such as Prison Legal News, California Prison Focus, Prison Law Office, SJRA, PARC, FAMM and you can find others but please take the time to make some noise. The life you save maybe the one you love. Thank you very much for your help.
