

Topic: Government Shutdown

Written by
Jennifer Johnson

Under the Trump administration there has been too many shut down. I don't know about the other Americans.

I am tired of a government shut down that is affecting our American people, their families and living ~~and~~ stability. It's not fair to them especially if they are living from pay check to pay check. For now on out I believe every time there is a government shut down President Trump and Congress should be penalized until they can learn to solve ~~we~~ ~~we~~ together. Why do we keep funding the govern short implements. There needs to be a long term goal so we can stop visiting the mountains in every few weeks. This is not a situation where I am poor. I need to buy a loaf of bread so I need to put 50¢ aside everyday until I can afford the loaf of bread. This a bigger situation so it need a long term goal to solve the ~~we~~ once and for all. We never had a government shut down with other president frequently. What's up President Trump and Congress why are we re-visiting this redon it situation over and over. Please Explain to American people why?

Topic: Immigration

Would 5 billion would be feasible to build a wall? absolutely not because look how many immigration dying in boats or trying to cross the waters to get to American. There are other factual means that can get you to American. 5 billion would be a waste of money. That money can spend on other things in United States government. We have spent too much time on immigration reform when there are serious ~~we~~ in America to be fixed. There are criminals every where in United States and ~~off~~ overseas they have to want to change their own minds to not be that way. The American are lacking in many areas because our President is spending too much time in over exaggerated situation that he say is a problem but not necessarily when you do a fact check.
