"MEDICAL STAFF LYING"

I'm sitting here suffering in excruciating pain, my Mother calls medical to try to get them back here to do something. A Nurse Kelly here calls my mother back and says "I sent a nurse back there, she asked him how he was ,he said fine or okay." Now we've got video back here, that'll show no nurse came back here. So one of these nurses or both have lied, and in doing so violate 33-208.002 section (19) Rules of conduct. And P-dorm 6 wing left side bottom floor will substantiate that these nurses have told a boldface lie! No nurse will be seen on video stopping here. So if you've got a loved one in the FDOC, the one thing you can truly count on ,is staff will lie to your face, and not think twice about it! They don't care about your loved ones, they only care about shutting you up, and blowing you off. Centurion healthcare, is all about the money. So believe,nothing you hear from them, and only half of what you see.

If your reading this on my blog,feel free to share it, repost it, and report this unethical conduct to Secretary Mark Inch, because lying to family members,"VIOLATING"the rules of conduct is unacceptable behavior for a medical company that's been put in place, to ensure adequate healthcare is provided. Welcome to my world!
