Subject: July classes

My class schedule goes into full time now that I completed the initial 90 day program. I have a full day from 830 am to 315 pm with 4 class periods for the next 3-6 months. One class is math which is needed to prep for the Manufacturing class. Hopefully I make that cut so I can get the 6-month certificate and I think it's good for 6 credit hrs. It covers a lot of the factory type robotics and electronics.

*

A mandatory substance abuse class (6 months) and a series of Microsoft Word, Excel etc. Another 6 months.

*

The 2 nights a week Business Mngt class goes until January. It will be good to have full days, and the time will pass quickly, but more important is the mental exercise of a full days schedule. wdl
