"VIDEO GRAMS"

We've been informed that something has been posted on one of these websites stating that anyone on the south end of P-dorm death row housing, that sent a video gram will loose their tablets for a month. Well for starters, video grams started back two weeks ago. So obviously they were activated by the FDOC, and Jpay. The administrative yard officer's have known about it for two weeks, and even got us a back drop last week, so inmates aren't in the back ground of the video grams. This back drop was issued by higher ups. So this isn't some Union Correctional Institution security blunder by the entire administration! Their not going to botch the security of death row, the highest security institution in the state of Florida. These people knowingly returned the video grams, which is no different than the photographs that we,he been taking out there every week four the past year. Further more we had just heard back at the end of July that they (the FDOC)was going to be starting video visits and the video grams back up for death row. In fact several visits were even scheduled. Only to be delayed. And several video grams have even been rejected,which shows the administration has been monitoring them. When you consider all this, I doubt there's any truth to your rumors, for if anything it would be a security blunder at the highest level. Where staff has participated in the security breach and assisted the inmates in any type of violation for over two weeks. Where they have monitored, censored, sent and delivered the actual videos. Does that sound right? So where ever you heard this from, you may want to post this up there. Please take care and God bless you all.

Sincerely Ronald W. Clark Jr. #812974
