Antonio Brown allege sexual assault
with trainer

If you listen to the story, you can tell this individual out for the cash. I am past victim of three molestation and rape. Children that are molested are terrified of the perpetrator. Always feels helpless and nobody is going to believe you. A person who is raped or sexually assaulted would never go back for round two and three unless the perpetrator is aggressive and violent force the victim to be in their situation. If you call the police them going to harm you. It's hard to escape perpetrator. A person who is raped or assaulted by a non aggressive perpetrator continuously but only was aggressive during the action. They always looking over their shoulders. Not know if them going to attack. Scared to call the police because you been threaten. No where did the Hairs say you know Antonio Brown threaten me. I feel ~~as~~ it was agreeable between the two what was going on until she was not getting what she wanted out of the ordeal. Seriously I am tired of people who are just trying to ruin our men ~~reputations~~ reputation not caring these are serious allegation when you follow any type of sexual allegation. Versus their are victim out there who are being rape, molested or sexual assaulted. I've been done that way. I take this subject serious. The people who have been done this way ~~would~~ wonder if it was for real could you have made it through what we've been through. written by
