Dear American Correctional Institution. October 10, 2019

I'm coming to you concerning your current ACA audit here at Union Correctional Institution that's to take place next week. I'm sending you five grievances that have been approved, that are dealing with some very serious issues within p-dorm death row housing. I've already provided copies to several Florida Senators and House Representatives, so they are aware of these bio hazardous conditions and fire safety issues that this administration has acknowledge in these grievances. These are not new issues that have just recently appeared. They've been here during your past audits. Which shows that the audit team is not doing a sufficient job. And we need this to change. We need an ACA audit to actually mean and stand for something. And at this point it doesn't. The ACA has a black eye. Its word credibility and reputation has been tarnished. And I'm trying to make a difference and improve the conditions here. And all I'm asking is that you come in and really look at these conditions.

Thank you for your time and hopefully your help.

Sincerely Ronald W. Clark Jr. #812974

CC. Senator Randolph Bracy , Representative Anna Eskamani, Representative Carlos Guillermo Smith, Representative Susan Valdes.
