

# Lawsuit challenges California's assault weapon ban

I do not agree with this lawsuit. Why should we have assault weapons in our citizens hands. Assault weapons are made for military use only. Only the military should have ammunition magazines. The problem is we have people who are purchasing guns from people that are selling in secret or they getting others to buy them things like this when they know they dealing with mental health issues or ex-felony. Question is whying are you putting ~~gun~~ assault ~~weapons~~ and regular weapons in the wrong hands. These mass shooting are ridiculous. Many lives has been lost as result of people foolishness.

Then we have those who are licensed gun carriers who don't have any sense as well. They shooting and killing people they get into a road rage, arguments or somebody's cheating in the relationship the next thing you know they gun down. you need to ask yourself do I even deserve the right to bear arms? If so what I am doing with the opportunity. Then you have those who was license gun carriers that was defending themselves ~~for~~ far as self-defense but they end up in prison for murder. A lot of state doesn't have self defense law. Why is that? I feel a law abiding citizen with no criminal history do have the right to ~~bear~~ bear arm for the ~~on~~ lawful purposes such as ~~self~~ self defense.

inside and outside the home, competition, sport and hunting. which the government needs to implement this in all state explaining the use of the fine arm. you have the right to bear arm ok that is not telling the law abiding citizen nothing. An it gives the prosecutors and judges to lock innocent citizens for murder. when they was protecting themselves in some cases. But these assault weapon, sales and purchases of ~~am~~ ammunition magazines and police style body armor must be banned. There needs to be operation sting to get all these weapons being sold illegal off the streets in these big ~~city~~ cities.
