(WHEN TO GIVE UP)

REAL TALK ALWAYS:

For me the words "GIVE UP" is something i don't believe in because of my belief that i can obtain anything in life if i daily educate my mind, and never doubt or give up on the task in front of me.

So much of life is about you believen in yourself, and your ability to strive for what you want in life, and to strive for the things you want. Because once you've learnt to value the things you want in your life.

People tend to give up after they fail at something in their life. But they were trying to succeed at, and this because they feel like a failure in the eyes of those in their circle or family which causes them to continue to fail. Now failure seems to be your new since of living so anytime you go into something knew you think of failing first because there is no way you could succeed. However i believe that failure is something everyone should go through in their life because you won't know what you like until you've tried, and fail. YOU'LL NEVER UNDERSTAND HOW STRONG YOU ARE UNTIL YOU'VE UNDERSTOOD HOW WEAK YOU'VE BEEN.

(IS THERE A TIME IN YOUR LIFE WHEN YOU SHOULD GIVE UP?)
