Subject: Turning point in American history

Watching the public/live airing of the House impeachment hearing. Thank God for our American ways.

*

This is an incredible and defining moment in our history.

Right now, I imagine Russian President Putin is calling President Trump and telling him, "hey booba, don't worry, I got your back. Just deploy your tanks around the white house and start shooting people. Trust me, after a million or so getting killed and five million in-prisoned the country will be ours, I mean yours, all yours."

*

This is thee critical turning point in American history since World War II. This moment is defining our future course. The elections of 2020 and the 2 or 3 years that follow will change or defend America and the world to come for either justice or all out tyranny and evil.

*

I call on everyone to begin praying and fasting for Almighty Gods guidance and mercy for our country's future. Don't miss the events of this moment people. 2018-2020 is a critical and defining time that is testing the durability of the American way, our Constitution, our elections process by the "people" and for the people and will determine if our founding fathers risked everything for nothing.

This is the moment for our generation. Stand up and be counted! If the bullets fly, so be it!! If 10 million must be masacred due to this grievace interferance by Russia and Putin - don't give up!! Keep fighting!! History will be marked by OUR decisions now.

May God bless and protect us. wdl
