Subject: Character and Integrity matter

I would NOT have voted for Obama, but respected his office as President of the United States. During his administration he represented the US in an honorable manner and I gained great respect for him as my President. I did not like his Democratic policies, but he worked to better the Nation.

\*

I felt the same way for Bill Clinton. While I believed Hillary Clinton was an excellent choice for Secretary of State, the Benghazi disaster revealed her "Democratic" foolish notions that if we simply back off and are nice to our enemies they will not hurt us. That is a joke. That is when I realized Hillary would not be a good president. She lacked courage and conviction. As a person she would have done well, but her Democratic policies would have continued to harm America.

\*

I respect that we as a Nation NEED a strong President. These are dangerous days we live in. But Character and Integrity does matter. The desire for strength should not be to compromise our Honor.

\*

2020 will shape the course of our Nation's future, make no mistake about it.

\*

If President Trump and the Republican party are victorious in this impeachment and the President is reelected in 2020, America will transform into a dictatorship of some fashion.

\*

I understand now why the Republicans are so desperate to defend the President even with overwhelming evidence, even from his pre-president days...

\*

If the President is impeached, or not...If the 2020 elections are unfavorable for Republicans, this party as we know it today will no longer exist. This impeachment, this Presidency is the death of the Republican party.

\*

If the Republicans are victorious, I will not be surprised that the President's cabinet WILL charge and imprison those house leaders in the Democrat party.

★

Thus will begin the time of American Dictatorship.

★

God help us. I pray for all our leaders, even President Trump, and the voters/electorate that will set the course in 2020.

★

I will be voting also-those rights are mine
