Dear Erne,

Amen Sister! Thought IS boss. There is a subtle power of thoughts which weaves the web of weird, i.e. Thoughts have the power of materialization. Thoughts give rise to deeds, who doesn't understand that? And understanding that: Watch your thoughts - they will become words; Watch your words - they will become actions; Watch your actions - they will become habits; Watch your habits - they will become character; Watch your character - it will become your destiny.

Thus, as you said, "Postulates create our lives and the world".

POSTULATE n. [ML fr. postulare to assume; fr. to demand] 2a: to assume or claim as true. Hence, we are actually creating our future by our thoughts. Then the only vital question is whether we will be unconscious creators or conscious creators. Whether we will let the stray thoughts that invade our mind shape our future or if we will carefully cultivate the positive thoughts that will usher in the future we want.

Wishing "we could help Destiny", as you say, is implying that she needs help. Why in the world would you postulate that? I'm certain that she is knowingly the creator of her world - and her place in it. And that she has an intrinsic confidence in serendipitous opportunities she attracts. I am confident that she will learn by experience which opportunities to grasp and which to disregard. It's all part of the march through this life, as I see it. Happiness is borne by worthwhile activities, indeed! But there is only one person who for certain — can tell what will make one happy. She is a beautiful, intelligent young woman with a hedonistic pedigree of Will-Power, and an inherent Love of Truth. I trust that she knows that, and postulates accordingly.

You're helping prisoners in 7 States now who reach out to you just as I did Erne. Thank you for making it part of my SPO product. ML W
